Note to Parents and Guardians

This book is intended for young children, ages 4 to 7 or so, for whom psychotherapy is being considered. You can read it to your child, or a child who reads can read it with your help.

There are often many questions about psychological treatment of a young child: What is play therapy? What happens in a session? How does it work? Why do children see a therapist? This book talks about the following issues that your child's therapist will have explained to you before treatment begins, or may explain to you as treatment progresses:

- things a child does that indicate a possible problem (what therapists call "presenting problems");
- how a child enters treatment (referral);
- confidentiality;
- the therapist's office and equipment;
- the activity of play therapy (what actually happens);
- how a child improves over time;
- how treatment will end (a particularly anxious period for children in treatment) and how a child's anxiety will sometimes cause him or her to temporarily return to problem behavior at that time (temporary regression).

We have tried to answer these questions from the viewpoint of the young patient. At the end of this book, you will find "Information for Parents and Guardians" that provides you with more detail about reasons for referral and where to go for help.

We hope that this book will address some of the worries your child (and you) may have at the beginning of treatment.

Marc A. Nemiroff
Jane Annunziata

Note to Mental Health Professionals

This book was written to facilitate entry into treatment of the young child (ages 4 to 7). Our intention was to create a tool that could be used to explain the process of play therapy to the young patient. We wrote the book because we believe there is a real value in speaking directly to the child in this way—and, because, after years of treating children in private and community mental health care settings, we could find no similar resource.

The book discusses many of the questions and concerns that children (and their parents or guardians) have about psychotherapy. The text reflects, in very simplified language, our psychodynamic approach to play therapy. We hope that it is written in a way that a child can understand, but says things that adults need to know, too.

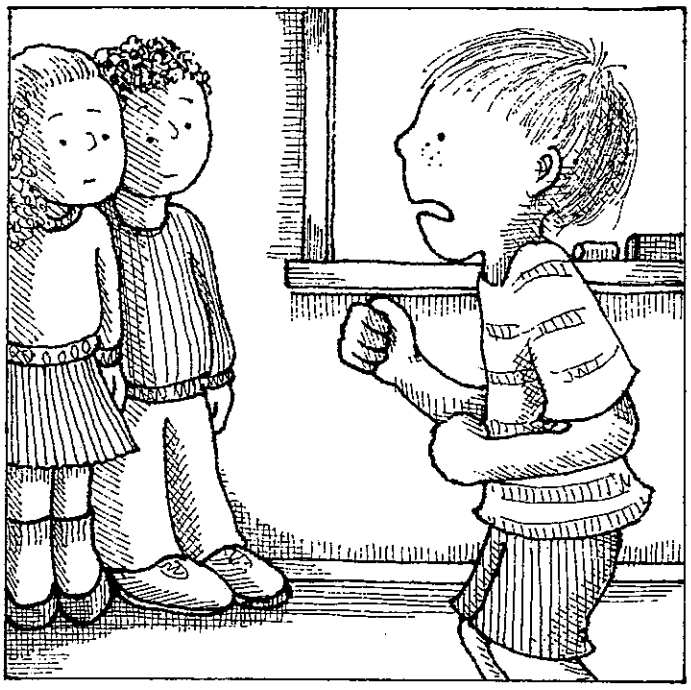

You may wish to keep a copy of this brief book in your waiting room so that youngsters and adults can peruse it there. You may also wish to give it to parents and others after recommending psychotherapy for a child. Guidance counselors or special education teachers may find it particularly useful when referring a family to a child therapist. More fragile children may also be able to use it as a bridge between them and their therapists and find comfort in being able to read it between sessions.

Have you ever noticed how some kids have problems?

שמת לב שלפעמים יש לילדים בעיות?

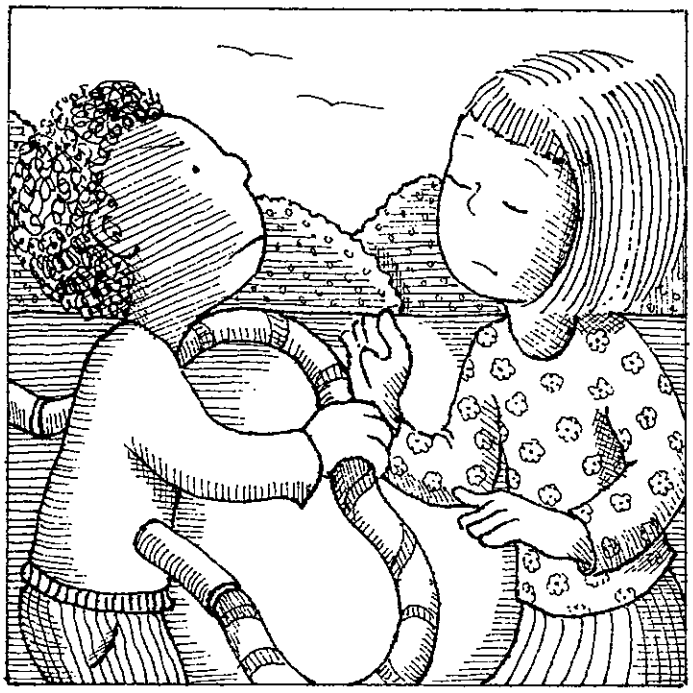

They might get into fights a lot.

אולי הם רבים הרבה
עם חברים,
ולפעמים אפילו
הולכים מכות.

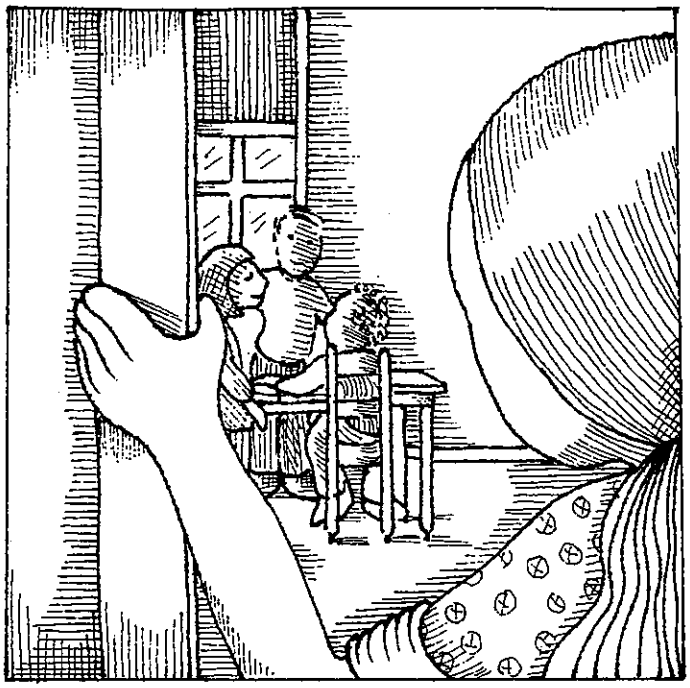

They might have trouble sharing.

אולי קשה להם
לשתף אחרים בצעצועים,
או לחכות לתור שלהם.

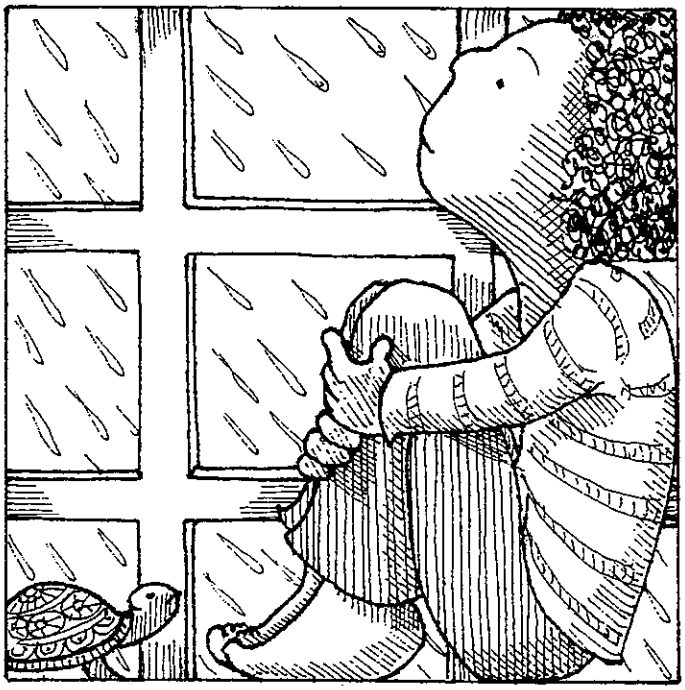

They might
feel very
shy and nervous
around
other kids.

אולי הם מתביישים
ליד ילדים אחרים
וחוששים לגשת אליהם.

Or maybe
they worry
a lot.

או שאולי הם
דואגים כל הזמן
מכל מיני דברים.

Doing one of these things
a lot means that kids have
problems.

כל הדברים האלה הם סימנים שלילדים יש בעיות.

A problem is a thing you
worry about or feel bad
about.

בעיה היא משהו שמדאיג אותך, או גורם לך להרגיש רע.

Sometimes a problem
makes you want to cry,

לפעמים בעיות גורמות לך לרצות לבכות,

Or hit someone,

או להרביץ למישהו

Or be all by

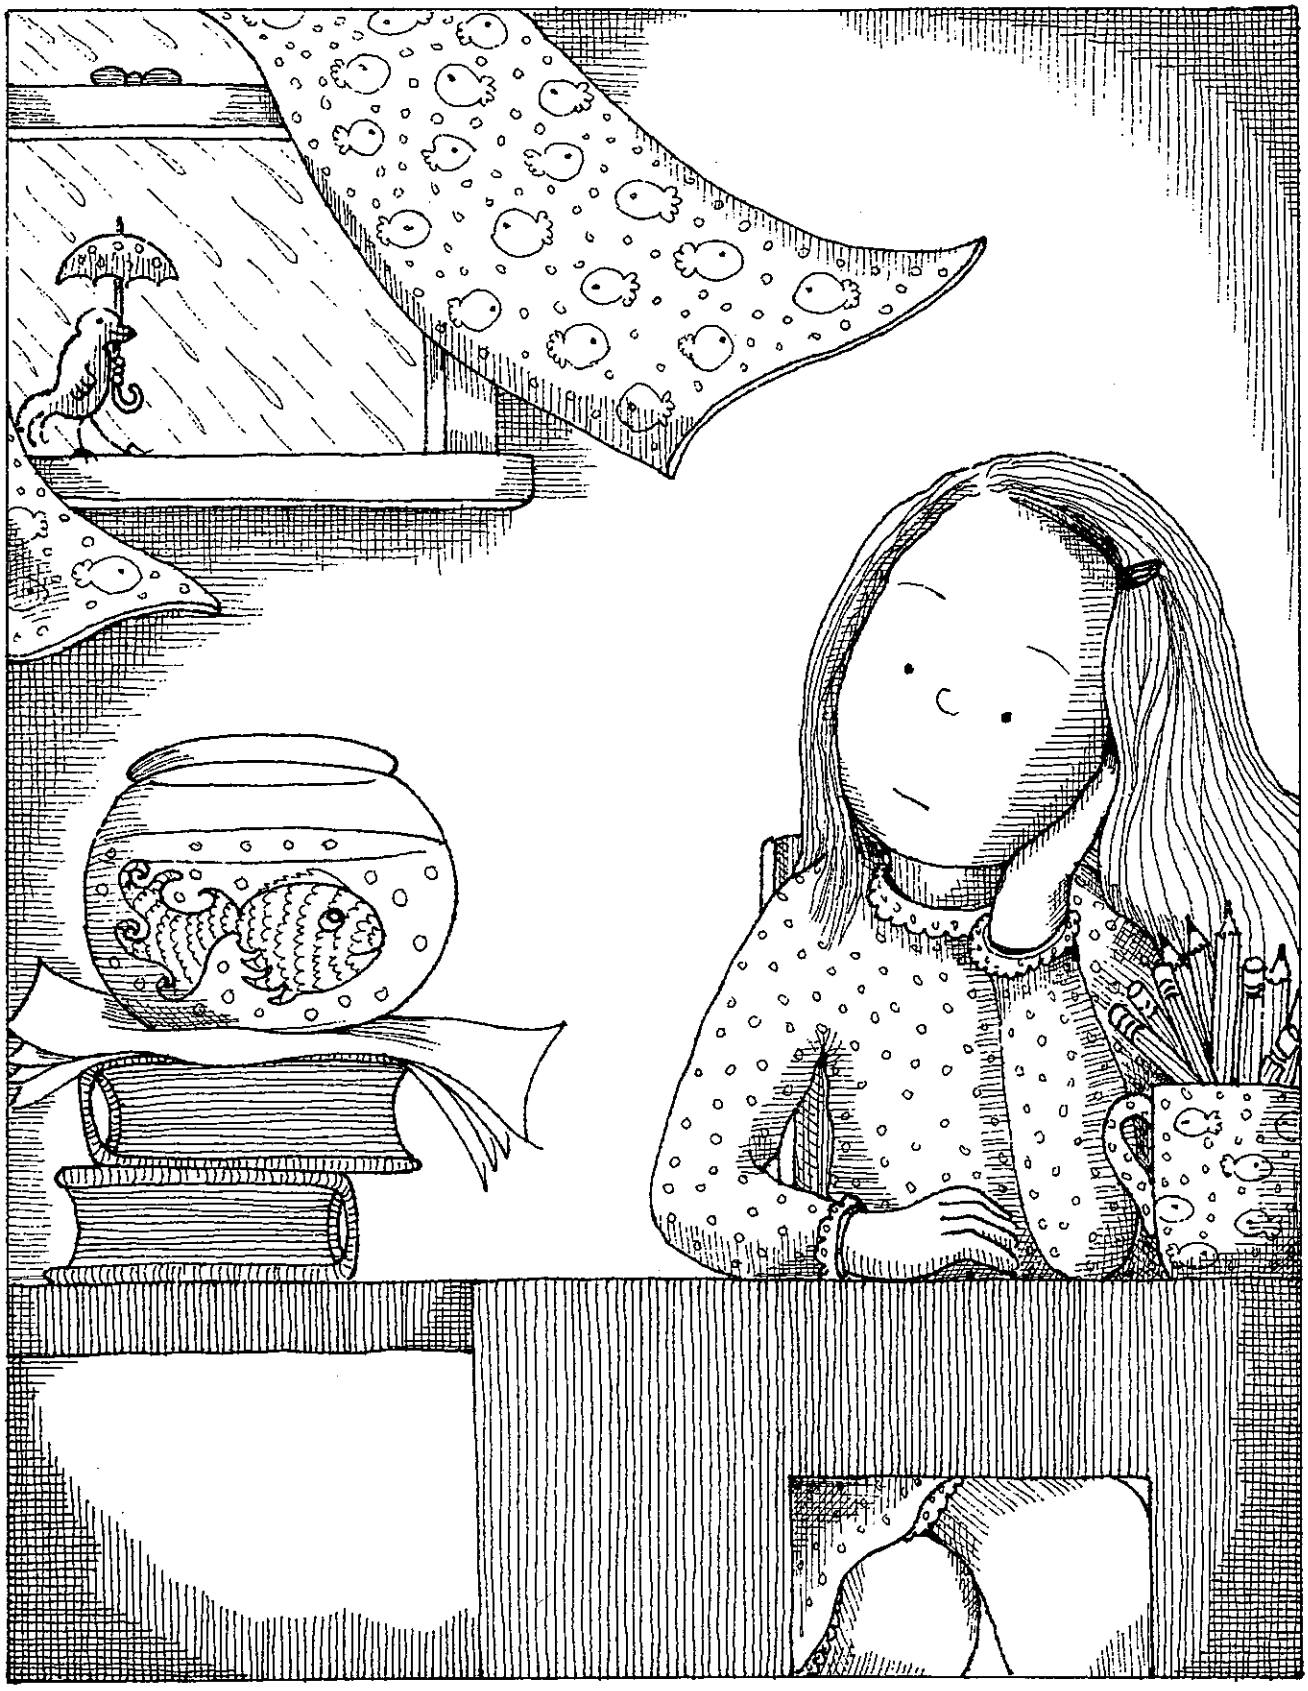

או להיות

לגמרי

Yourself.

לגמרי

לבד.

It's hard to keep having these problems. It bothers children. They don't know where the problems come from. So, they can't make them go away.

זה ממש ממש קשה כשיש בעיות כאלה.
זה מפריע לילדים.
הם לא יודעים מאיפה הבעיות האלה באו.
אז הם לא מצליחים להיפטר מהן.

Then

They

Need

Help.

ואז
הם
צריכים
עזרה.

Sometimes a mom or dad can help.

But sometimes you need special help.

לפעמים אמא או אבא יכולים לעזור

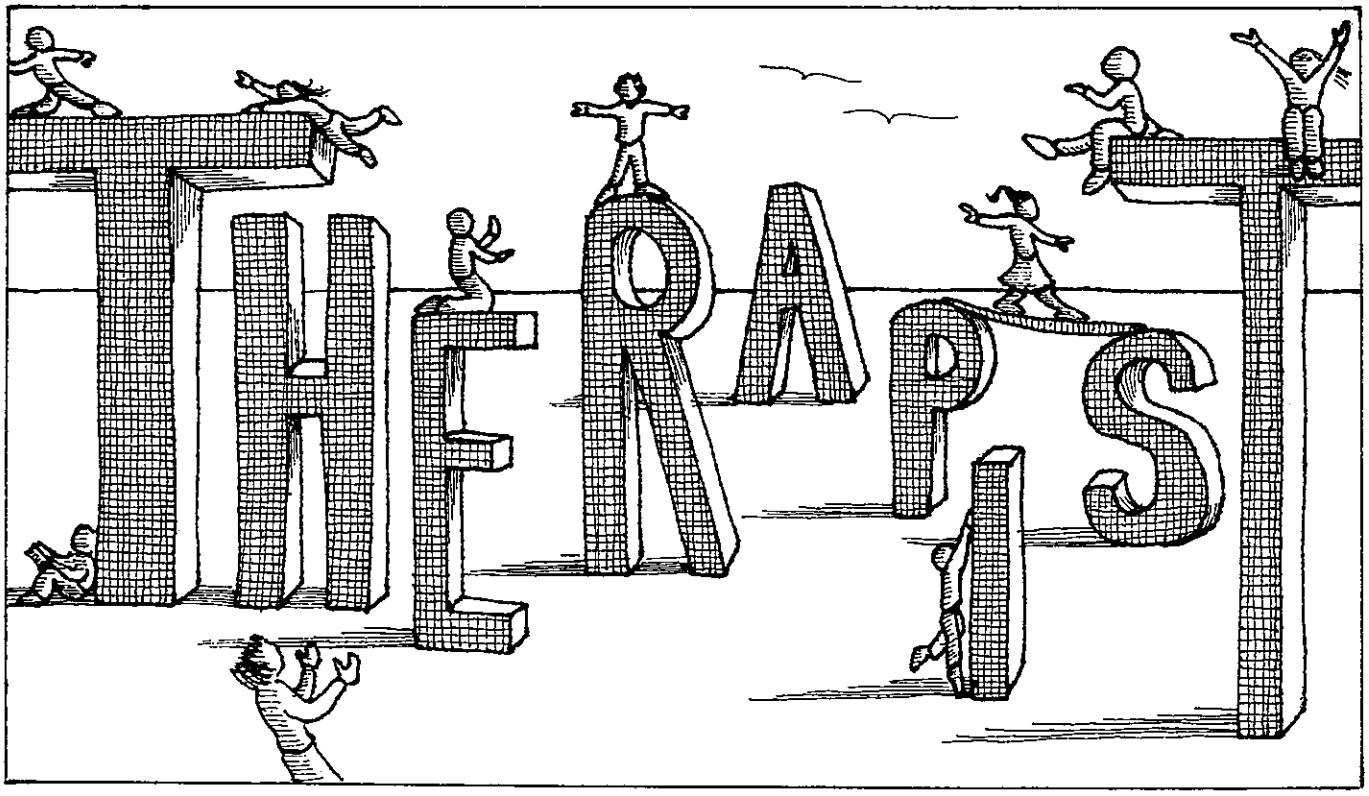

אבל לפעמים צריך עזרה מיוחדת

There are special kinds of helpers for children with these kinds of problems.

יש עוזרים מסוג מיוחד,
שעוזרים לילדים עם בעיות מהסוגי
האלה.

Some people call them "worry doctors," but their real name is child therapists.

יש אנשים שקוראים
לעוזרים האלה "רופאי
דאגות", אבל השם
האמיתי שלהם הוא
מטפלים.

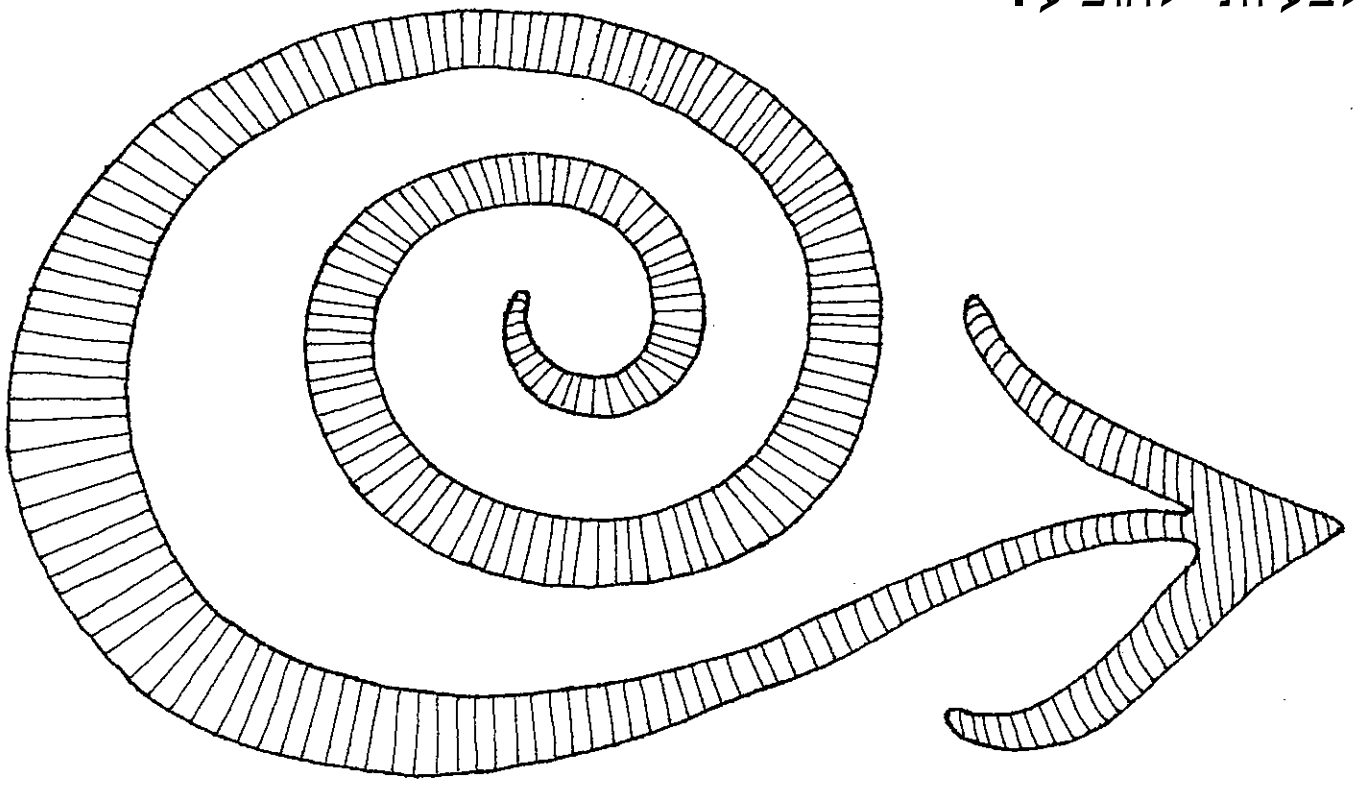

(There's only one other big word like "Therapist" in this book.)

(יש רק עוד מילה גדולה אחת בספר הזה, חוץ מ"מטפלים")

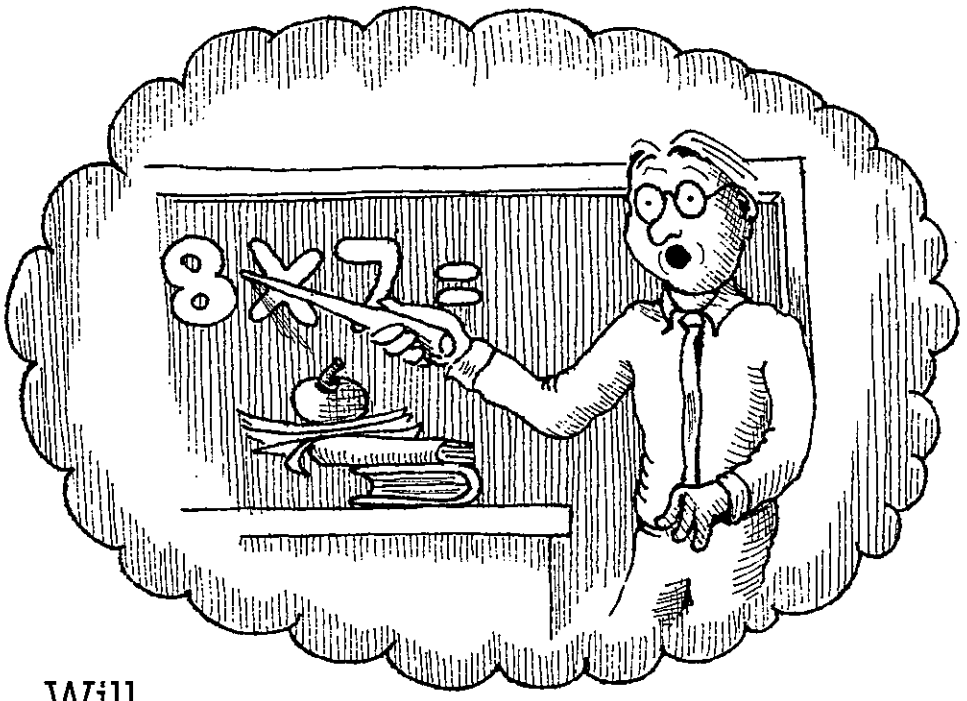

Child therapists help children learn about the worries and feelings that make the problems in the first place.

מטפלים עוזרים לילדים ללמוד על דאגות ורגשות שגורמי לבעיות להופיע.

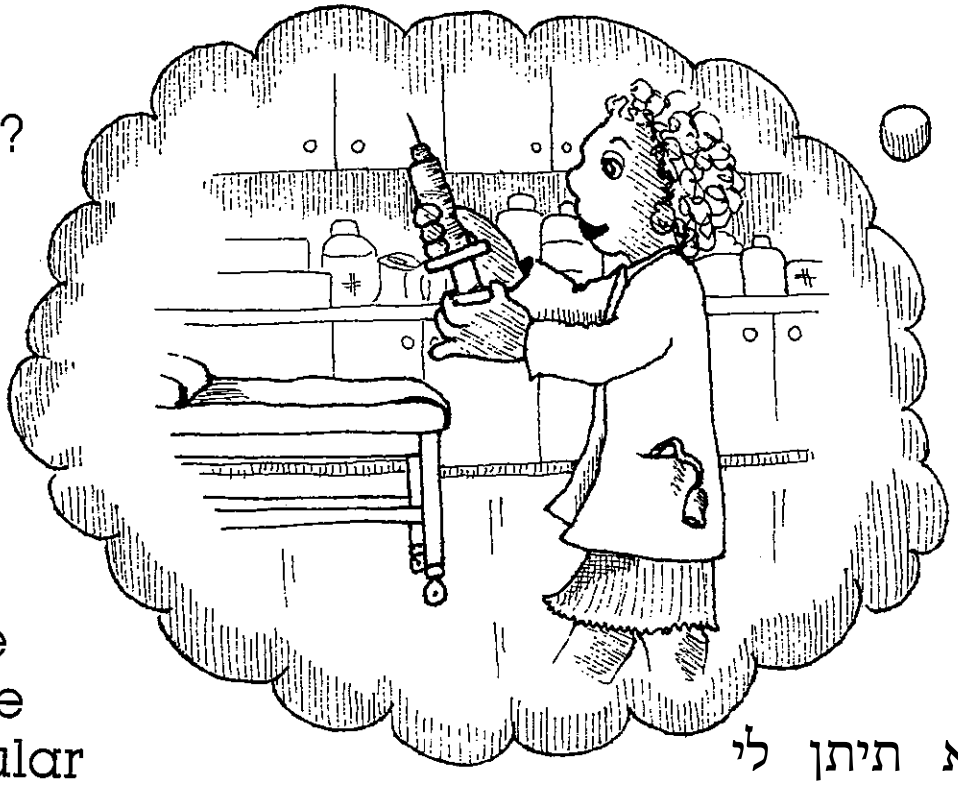

What happens when you visit a child therapist?

מה קורה
כשהולכים לביקור
אצל מטפל של
ילדים?

האם הוא ידבר
כמו המורה שלי?

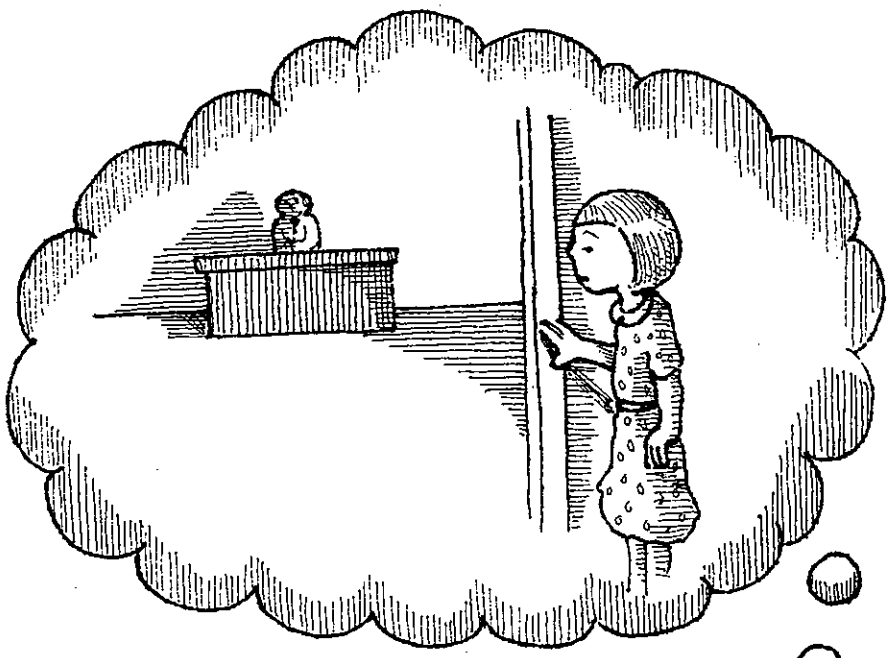

Will
he talk
like my
teacher?

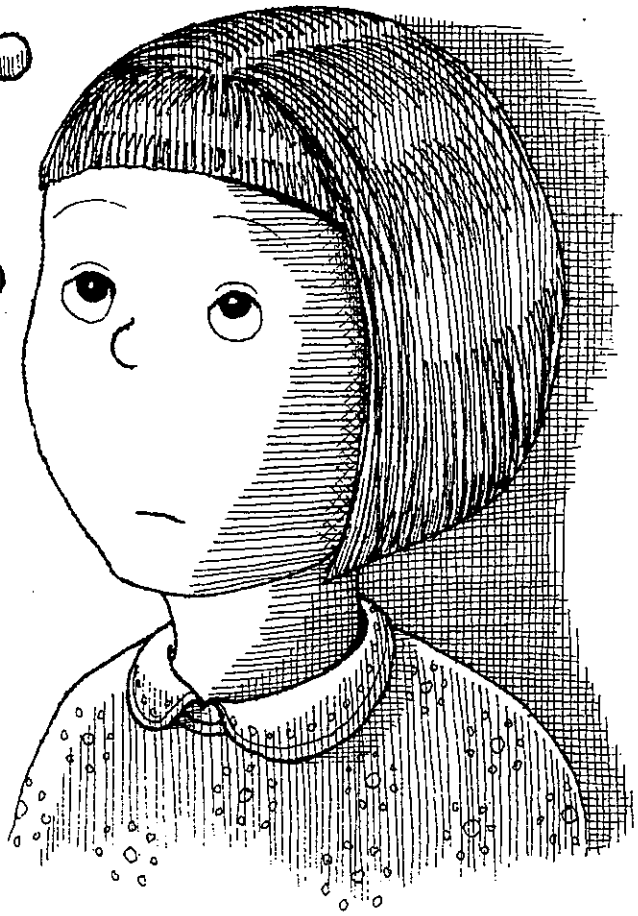

Will she
give me
shots like
my regular
doctor?

האם היא תיתן לי
זריקה כמו הרופאה
שלי?

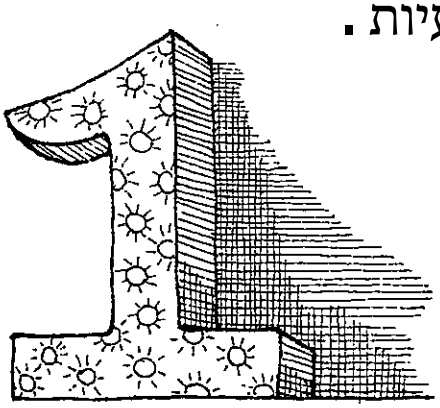

Will I
go all
by
myself?

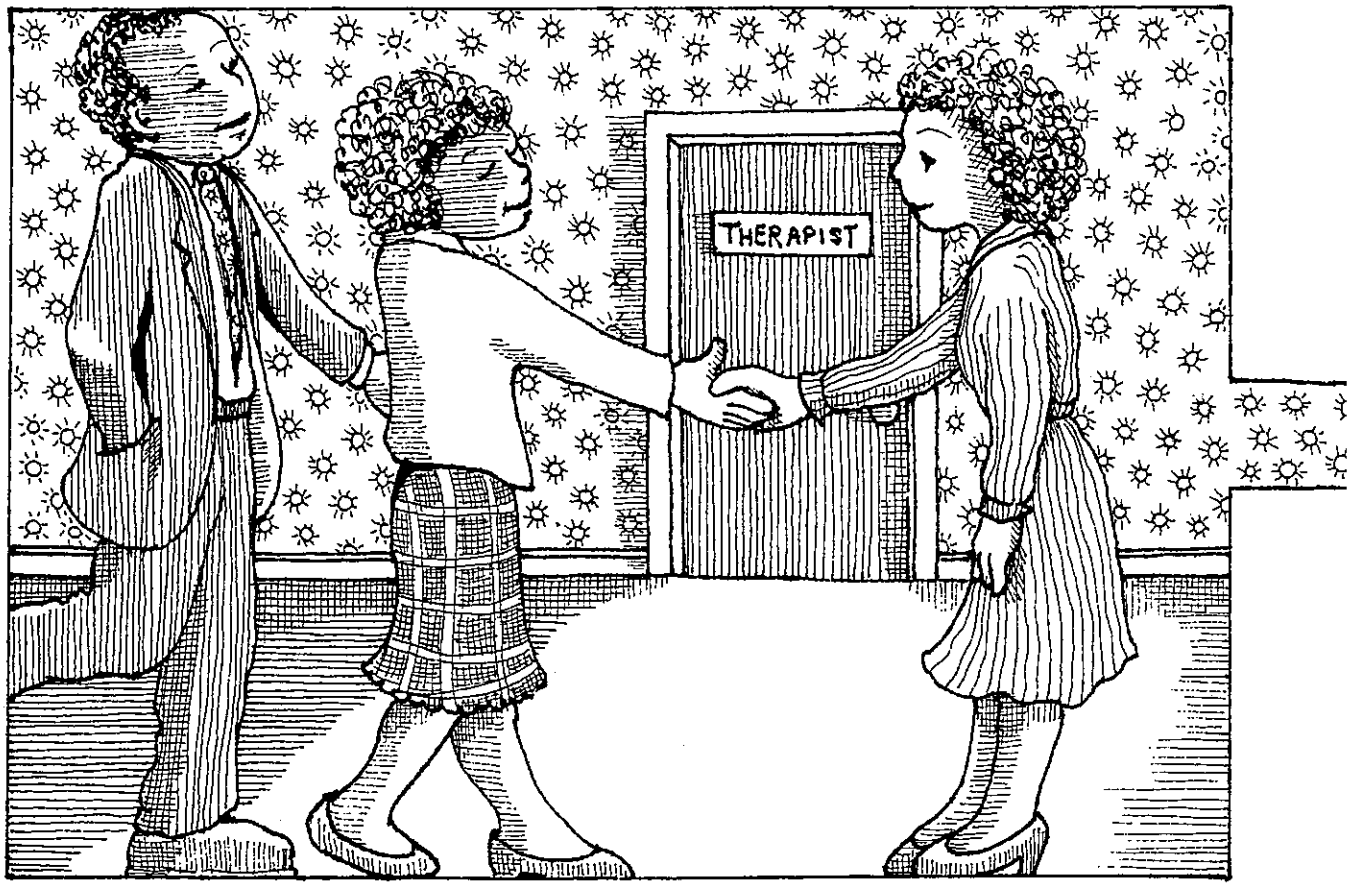

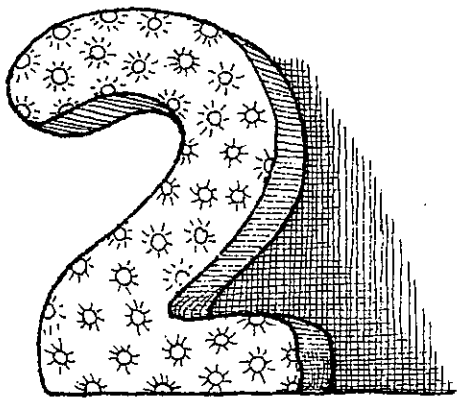

האם אני אלך
לגמרי לבדי?

קודם כל, המטפלת תיפגש עם ההורים שלך
כדי להבין את הבעיות.

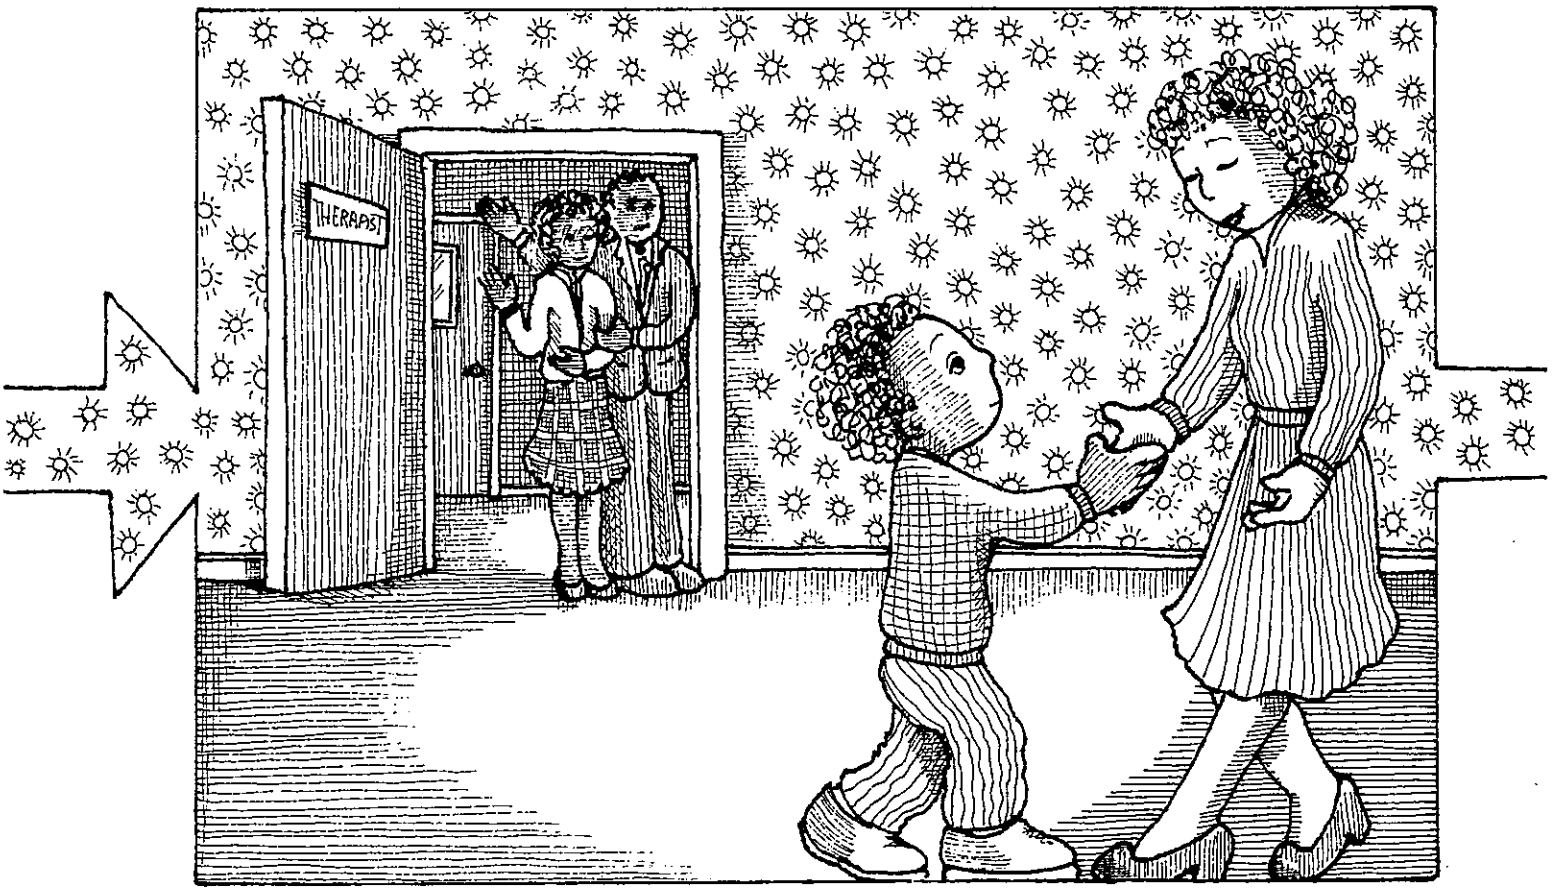

First, the therapist will meet with your parents to find out about the problems.

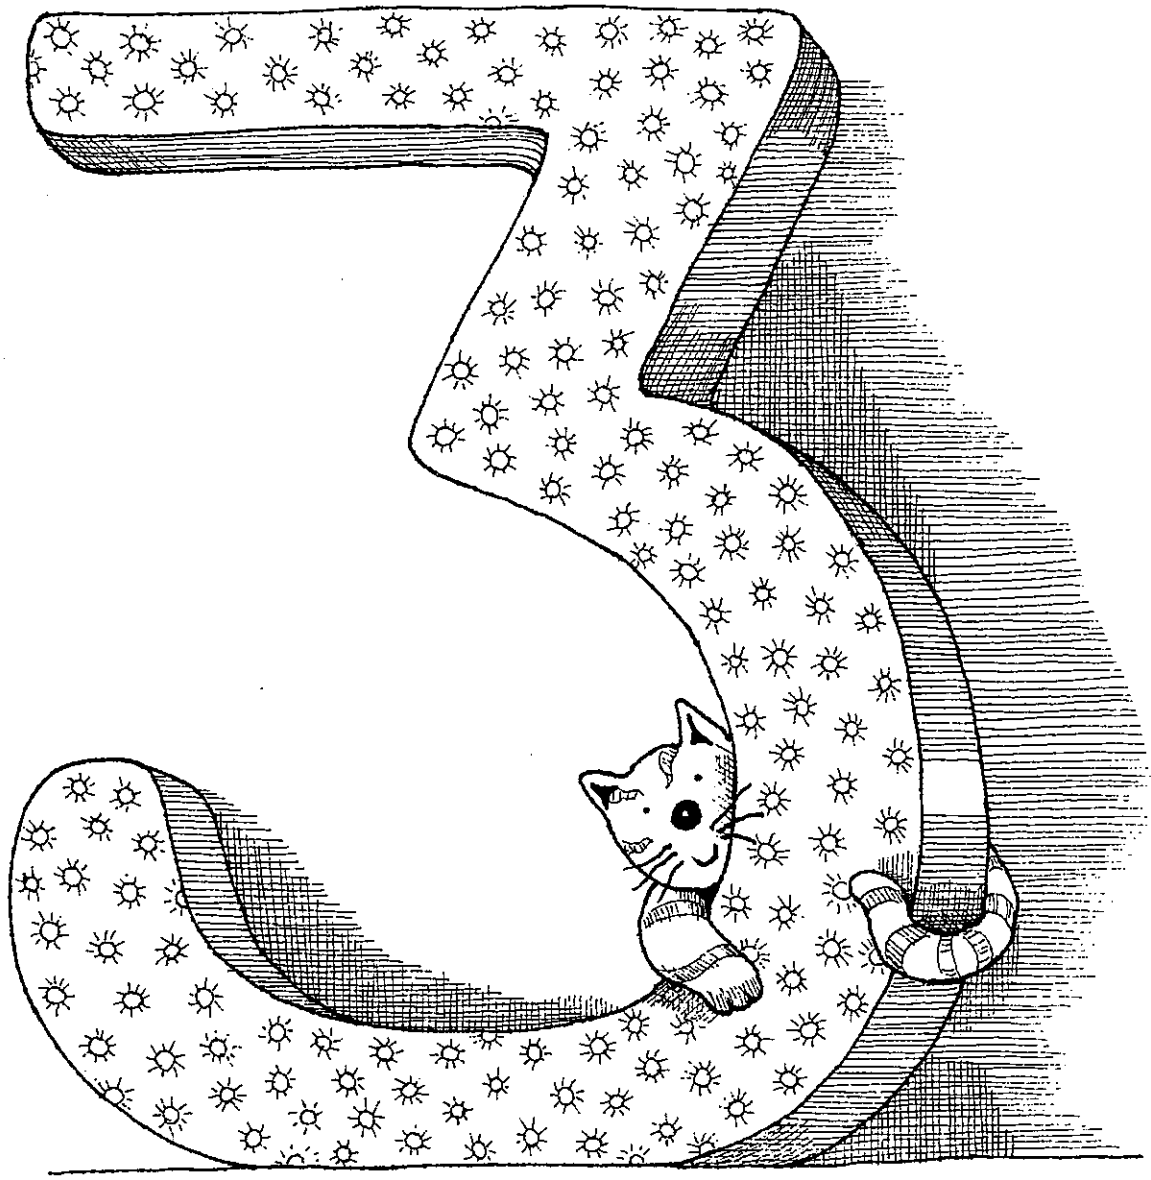

אחר כך,
ההורים שלך יביאו אותן
לפגוש את המטפל.

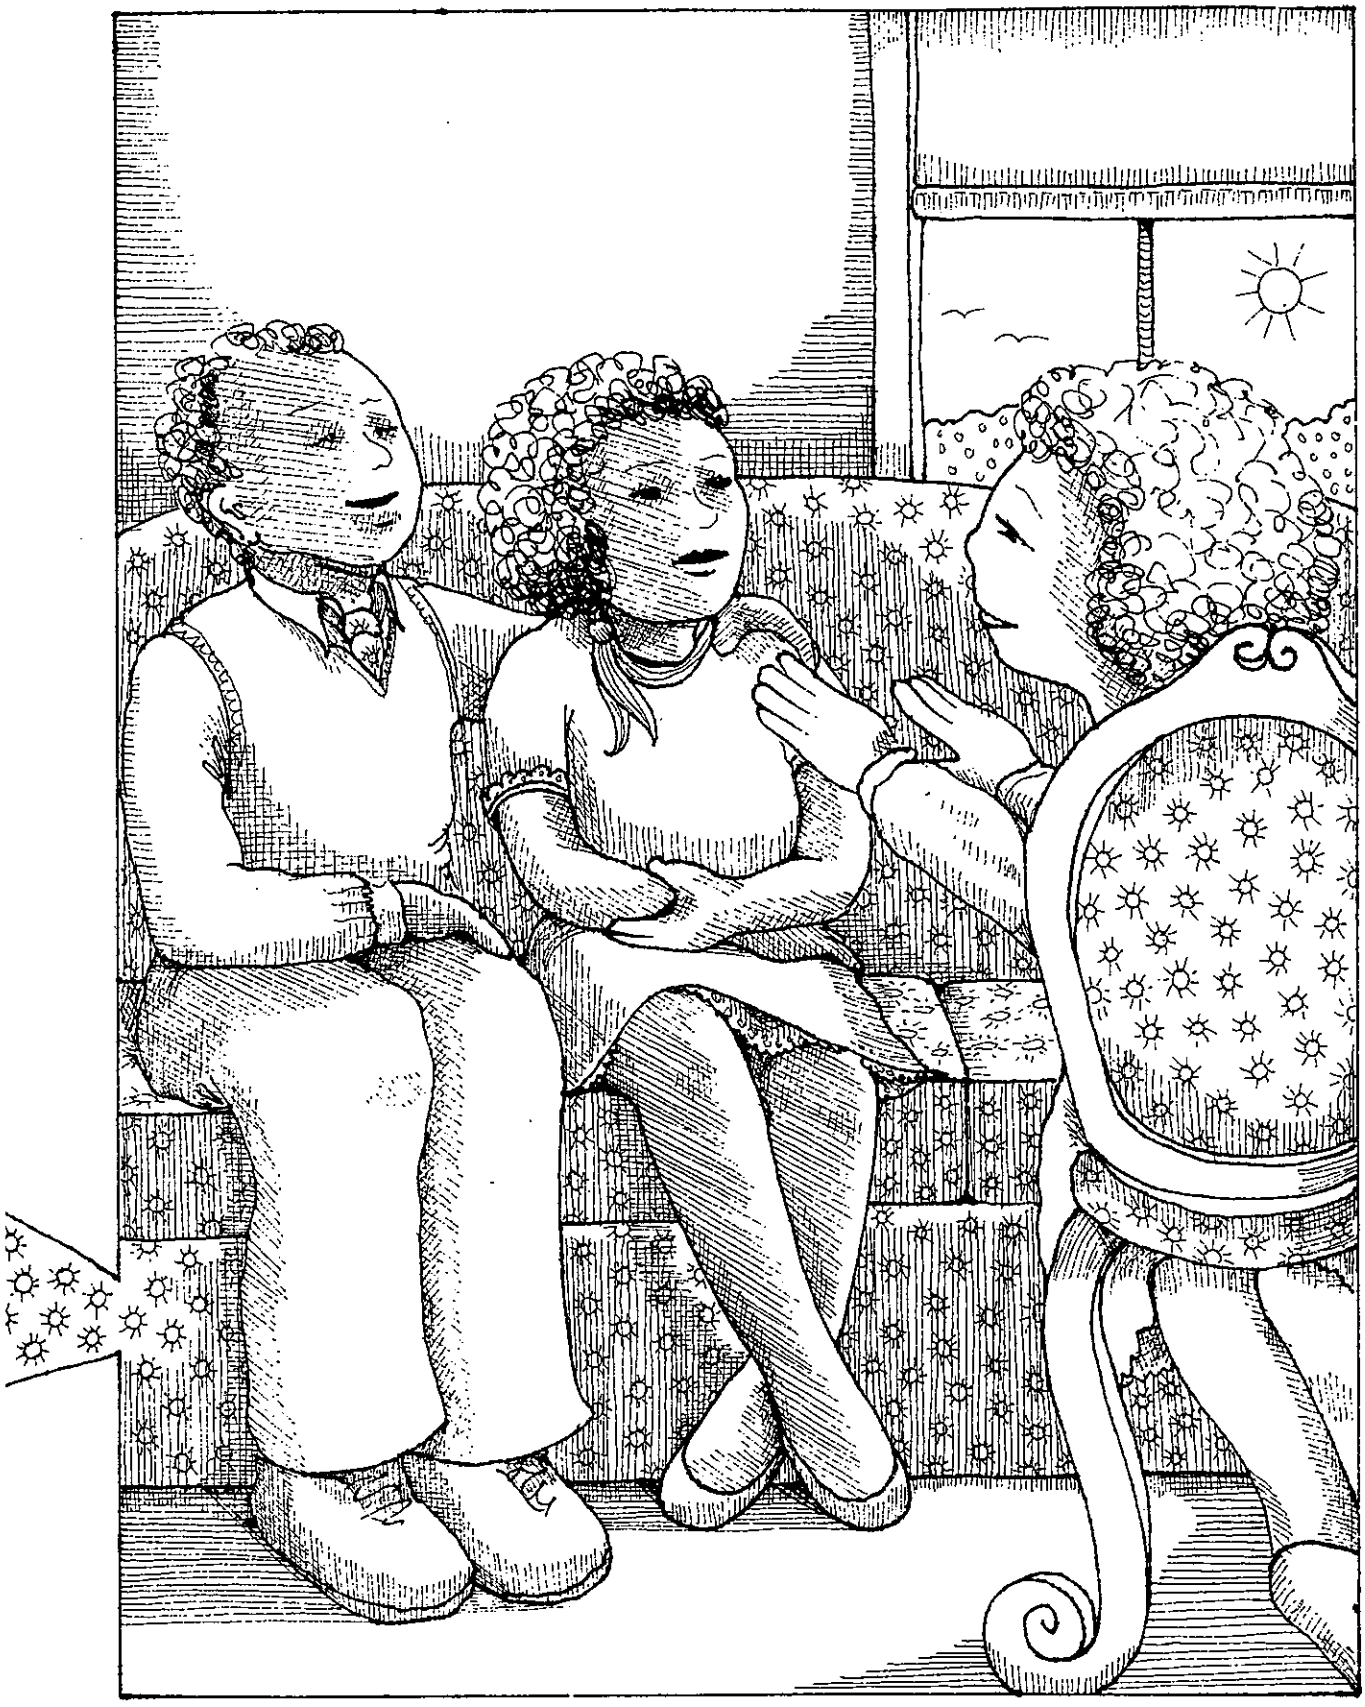

Second, your parents
will bring you to see
the therapist.

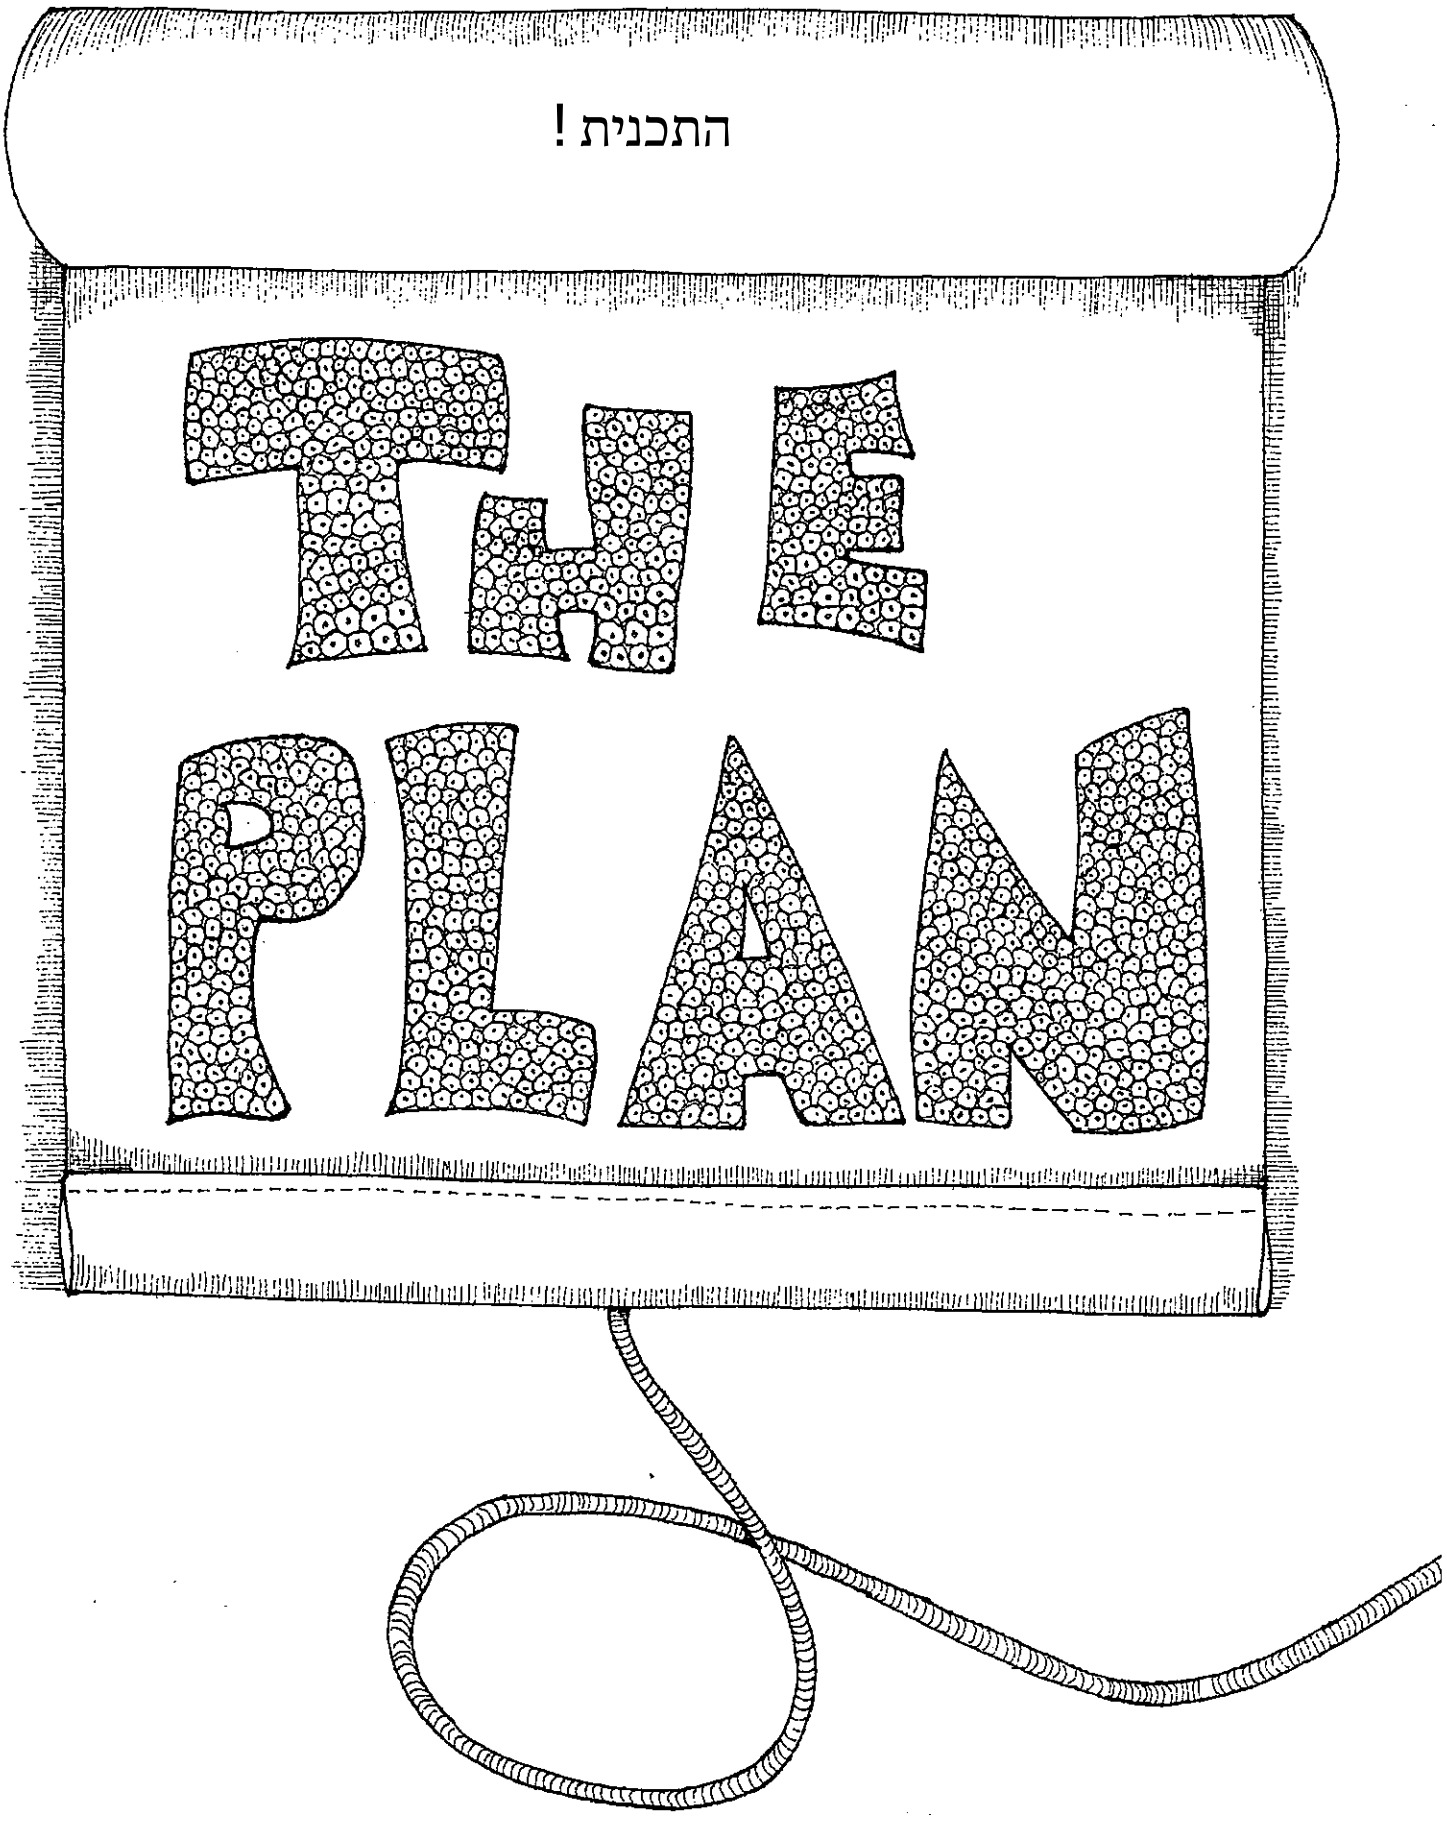

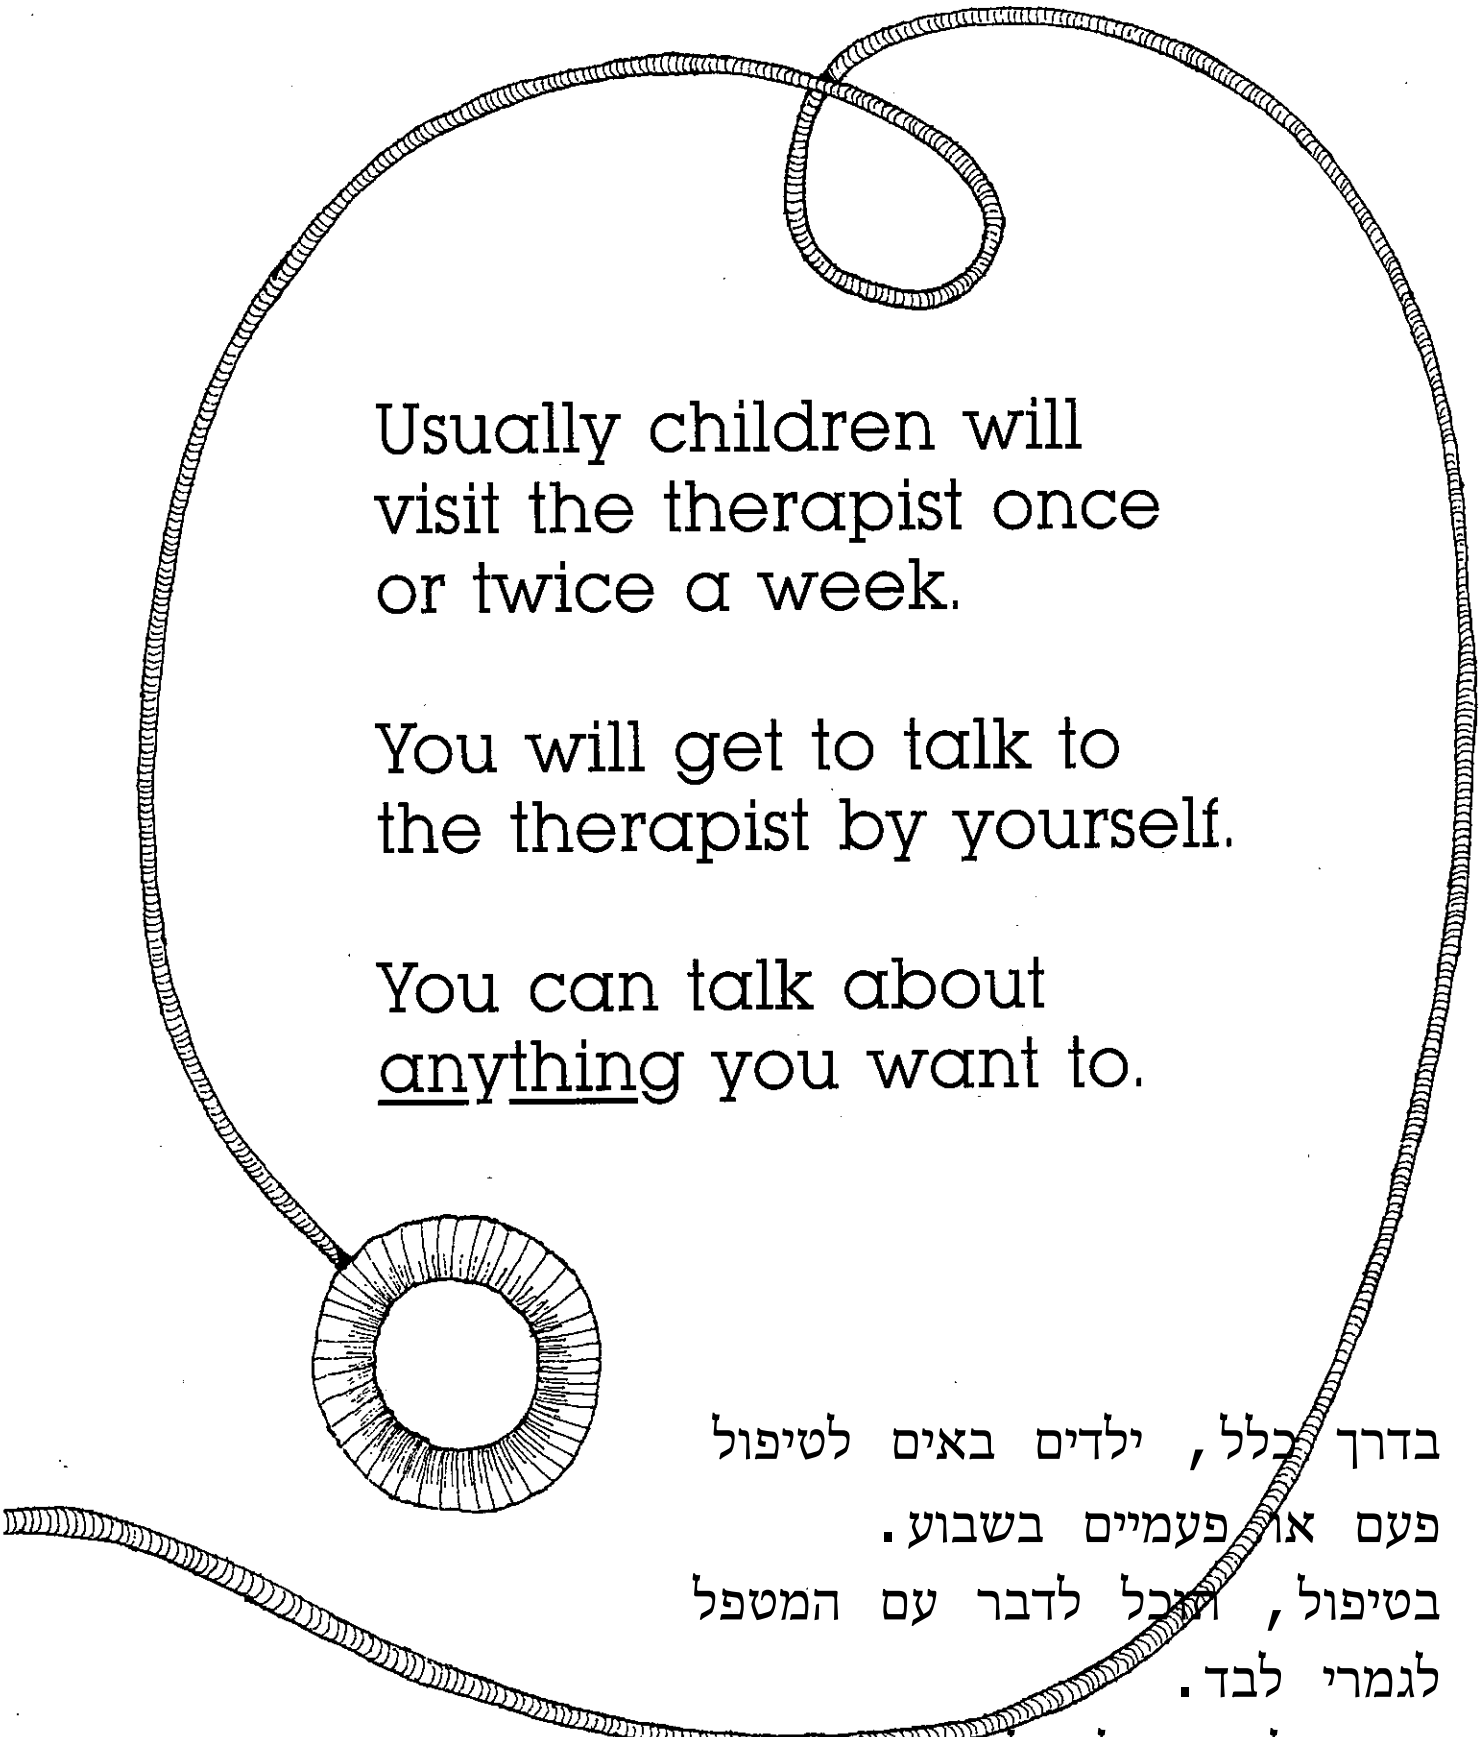

Then your parents and the therapist will plan the best way to help you.

ואז, ההורים שלך והמטפלת יתכננו תוכניר
כדי לעזור לך עם הבעיות.

התכנית !

Usually children will visit the therapist once or twice a week.

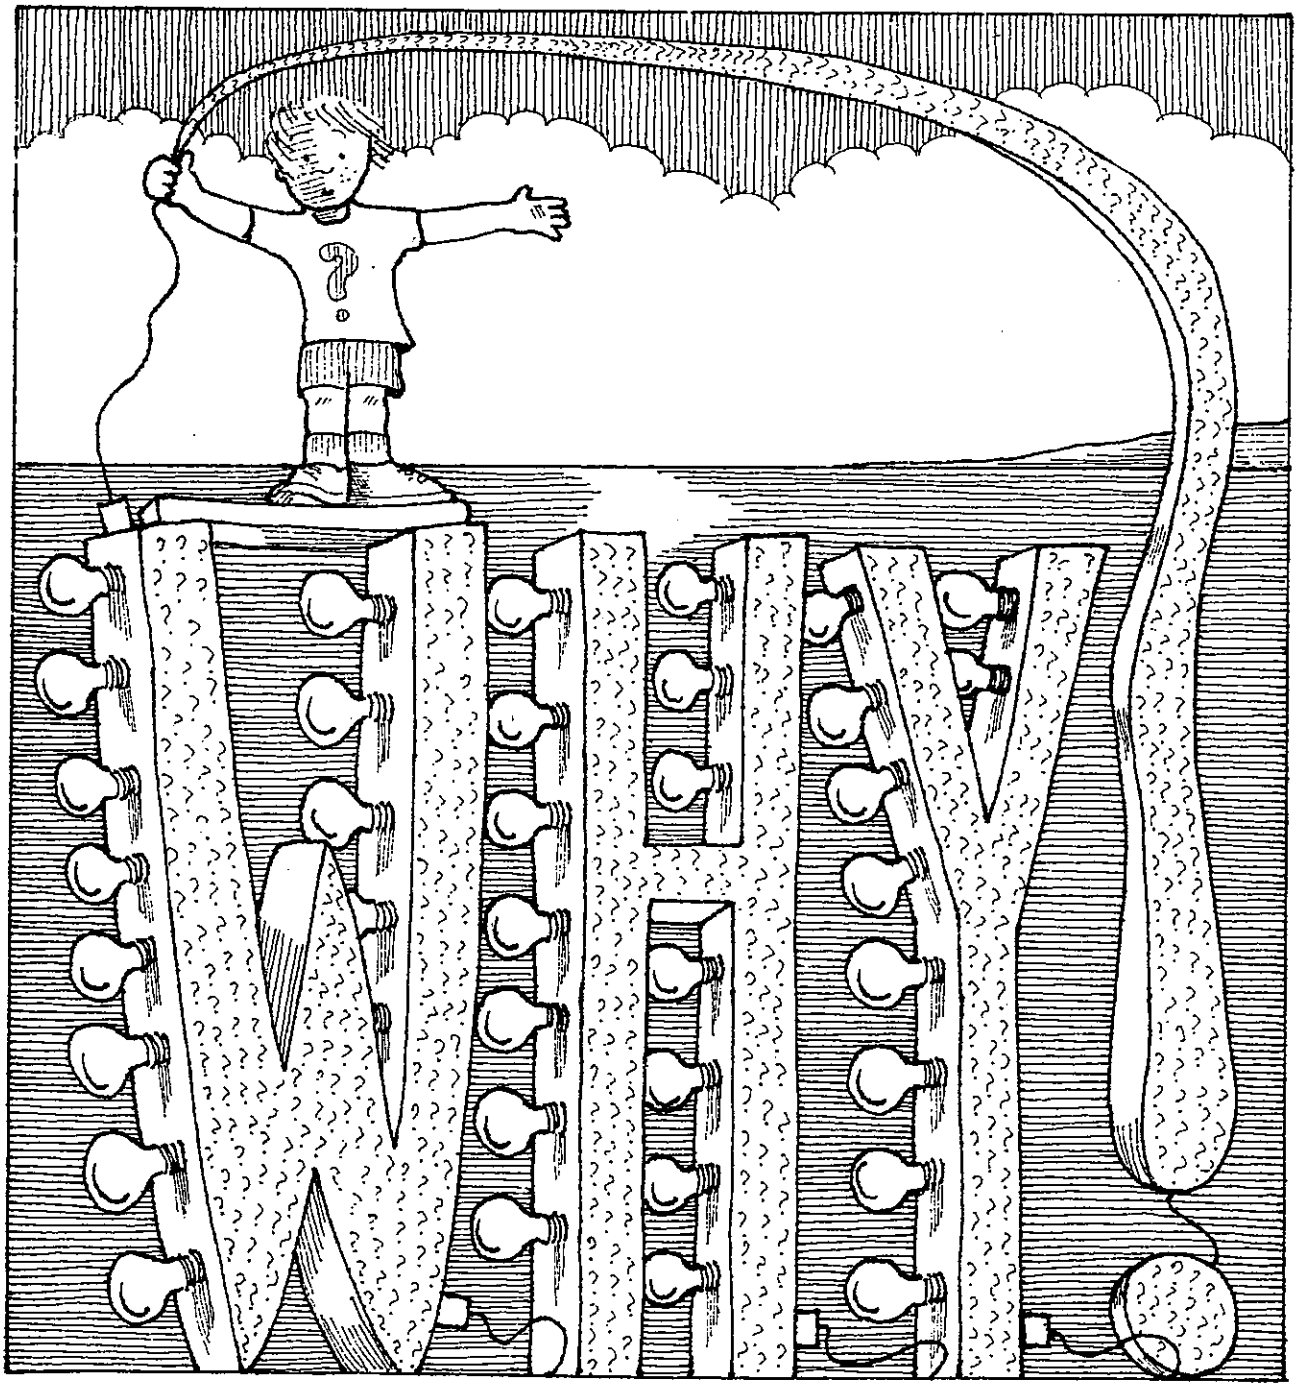

You will get to talk to the therapist by yourself.

You can talk about anything you want to.

בדרך כלל, ילדים באים לטיפול
פעם או פעמיים בשבוע.
בטיפול, תוכל לדבר עם המטפל
לגמרי לבד.
מותר לדבר על כל מה שתרצה.

Every once in a while,
your mom and dad will
talk to the therapist.

מדי פעם, ההורים שלך יבואו להיפגש עם המטפלת
ולדבר איתה גם.

Children get better quicker when parents meet with the therapist, too.

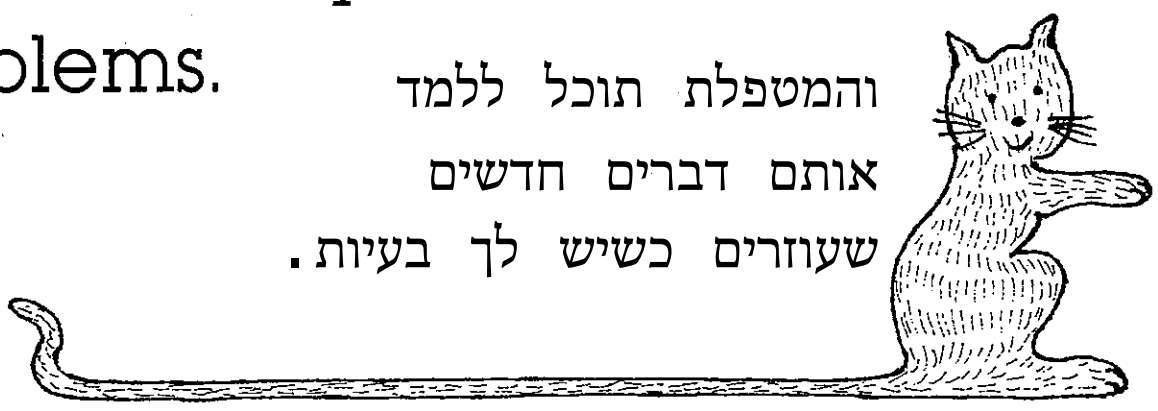

הבעיות של ילדים עוברות מהר יותר,
כשגם ההורים נפגשים עם המטפל.

They will help the therapist understand you. . . .

ההורים שלך מכירים אותך,
והם יעזרו למטפלת להבין אותך...

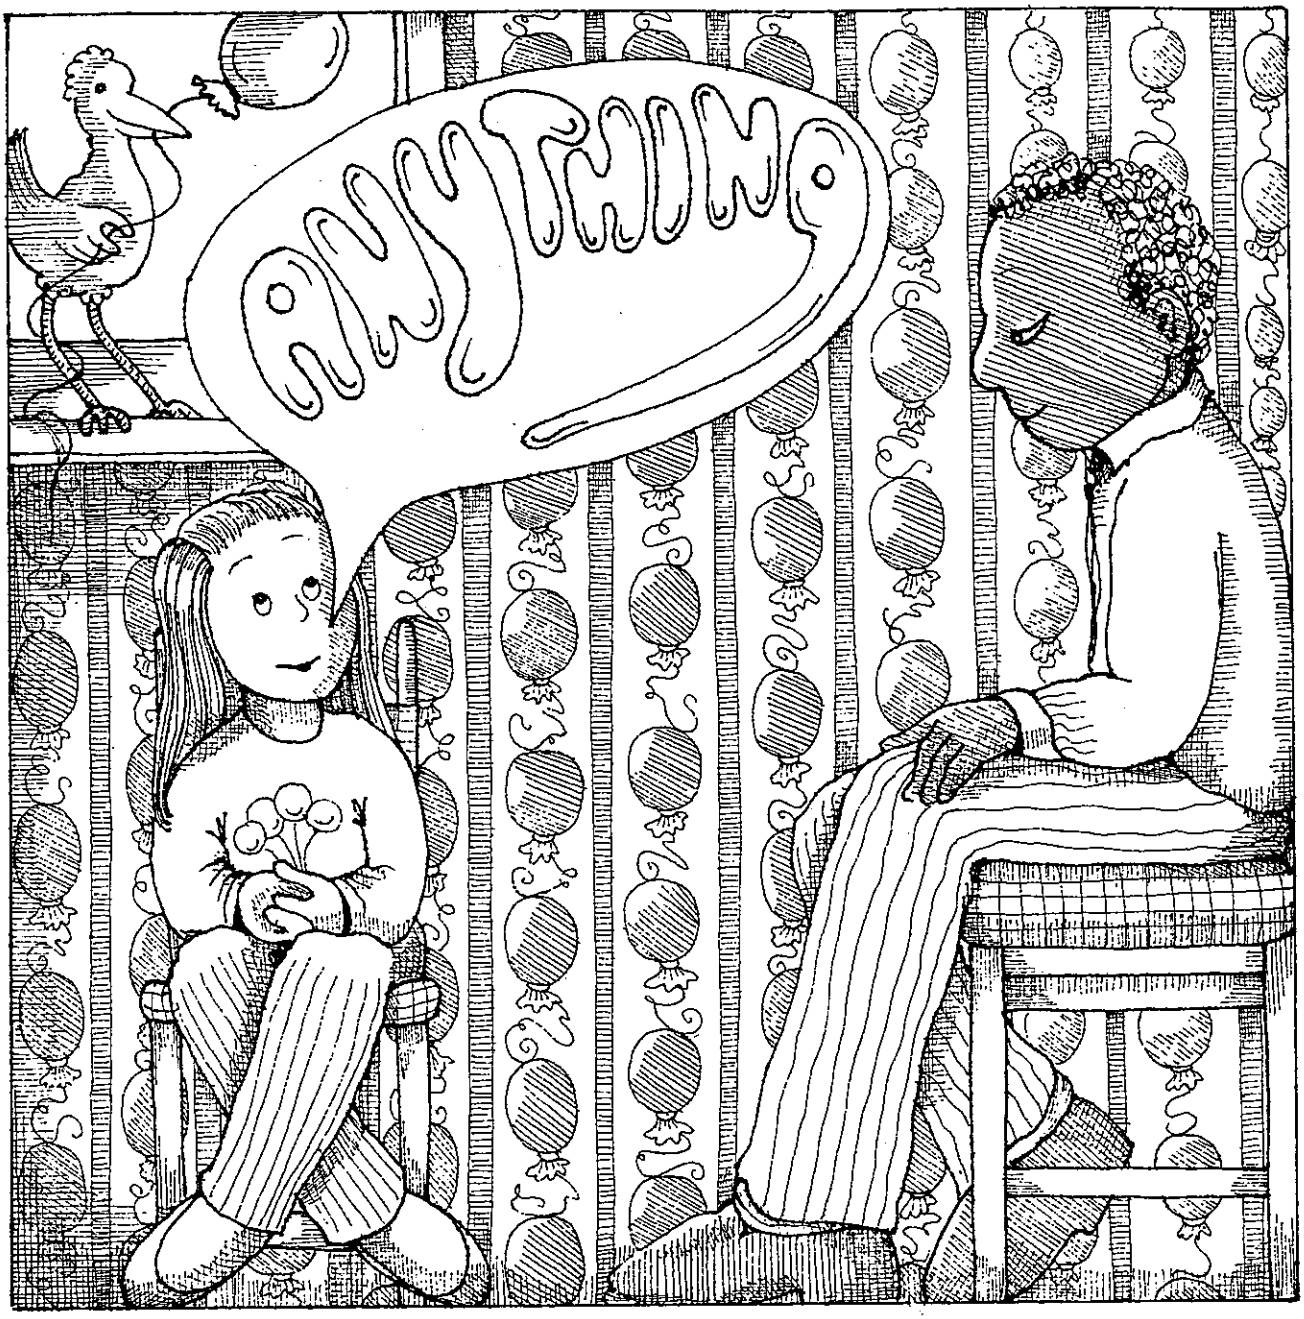

And the therapist will teach them new things to do when you have problems.

והמטפלת תוכל ללמד
אותם דברים חדשים
שעוזרים כשיש לך בעיות.

Do you remember we said that you can talk with the therapist about ANYTHING ?

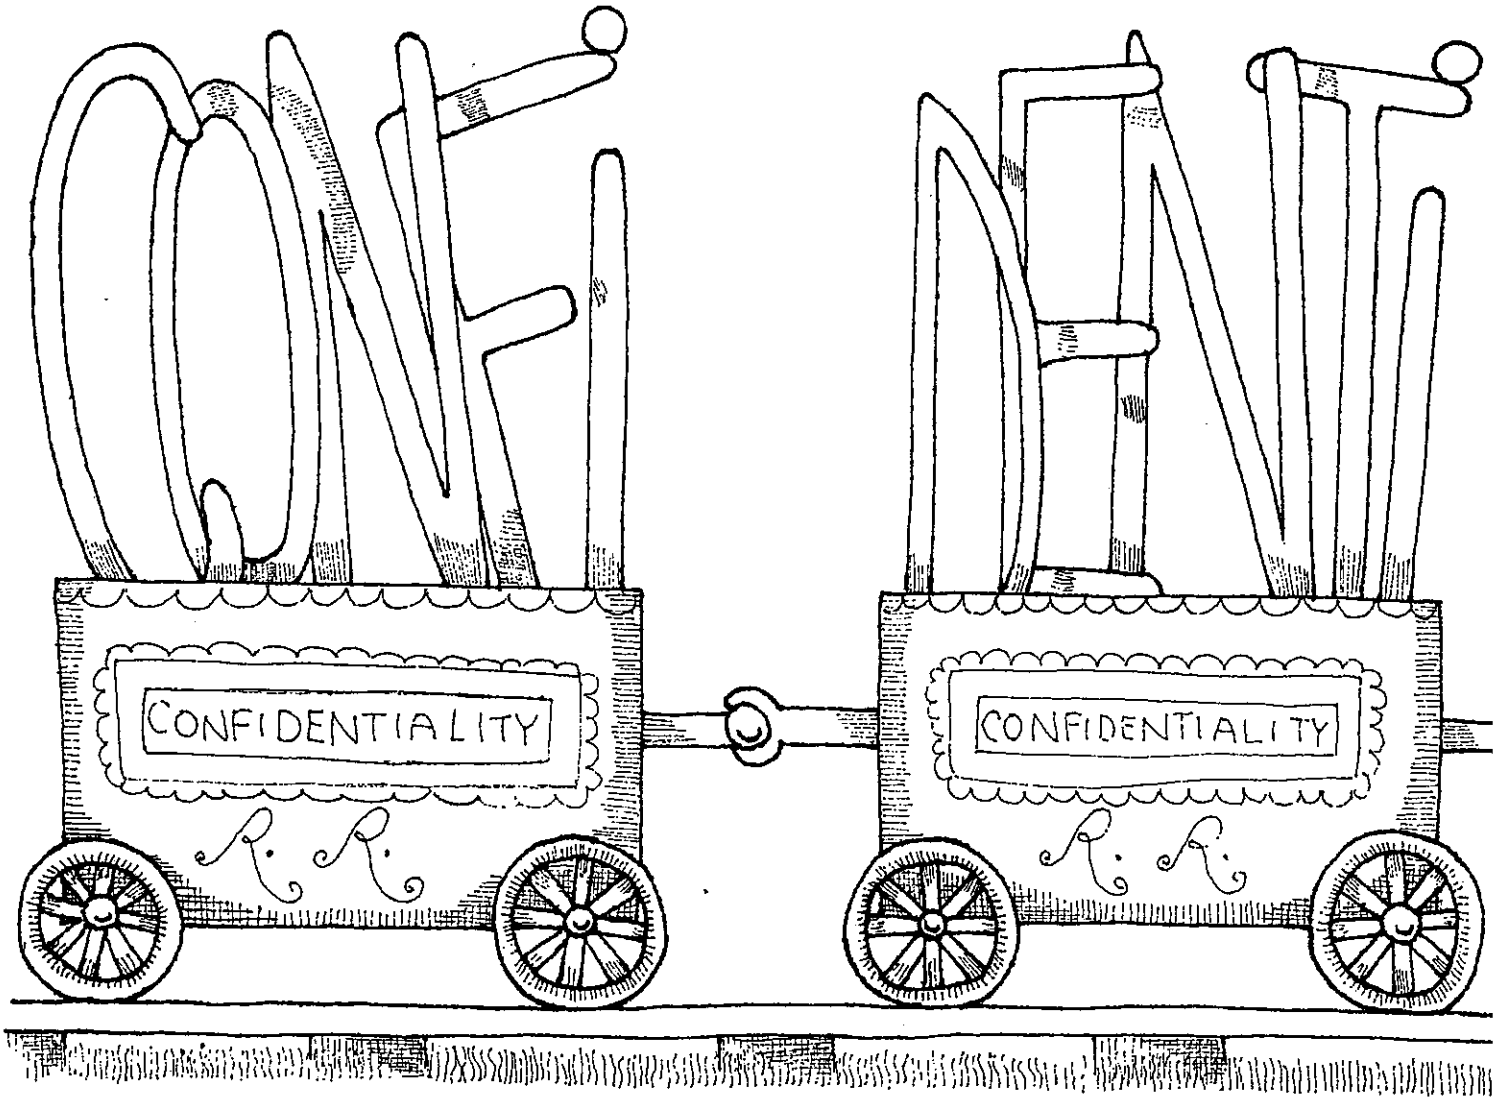

זוכר שאמרנו שמותר לספר למטפל כל מה שתרצה?

Well, there's something
important you need
to know about that. . . .

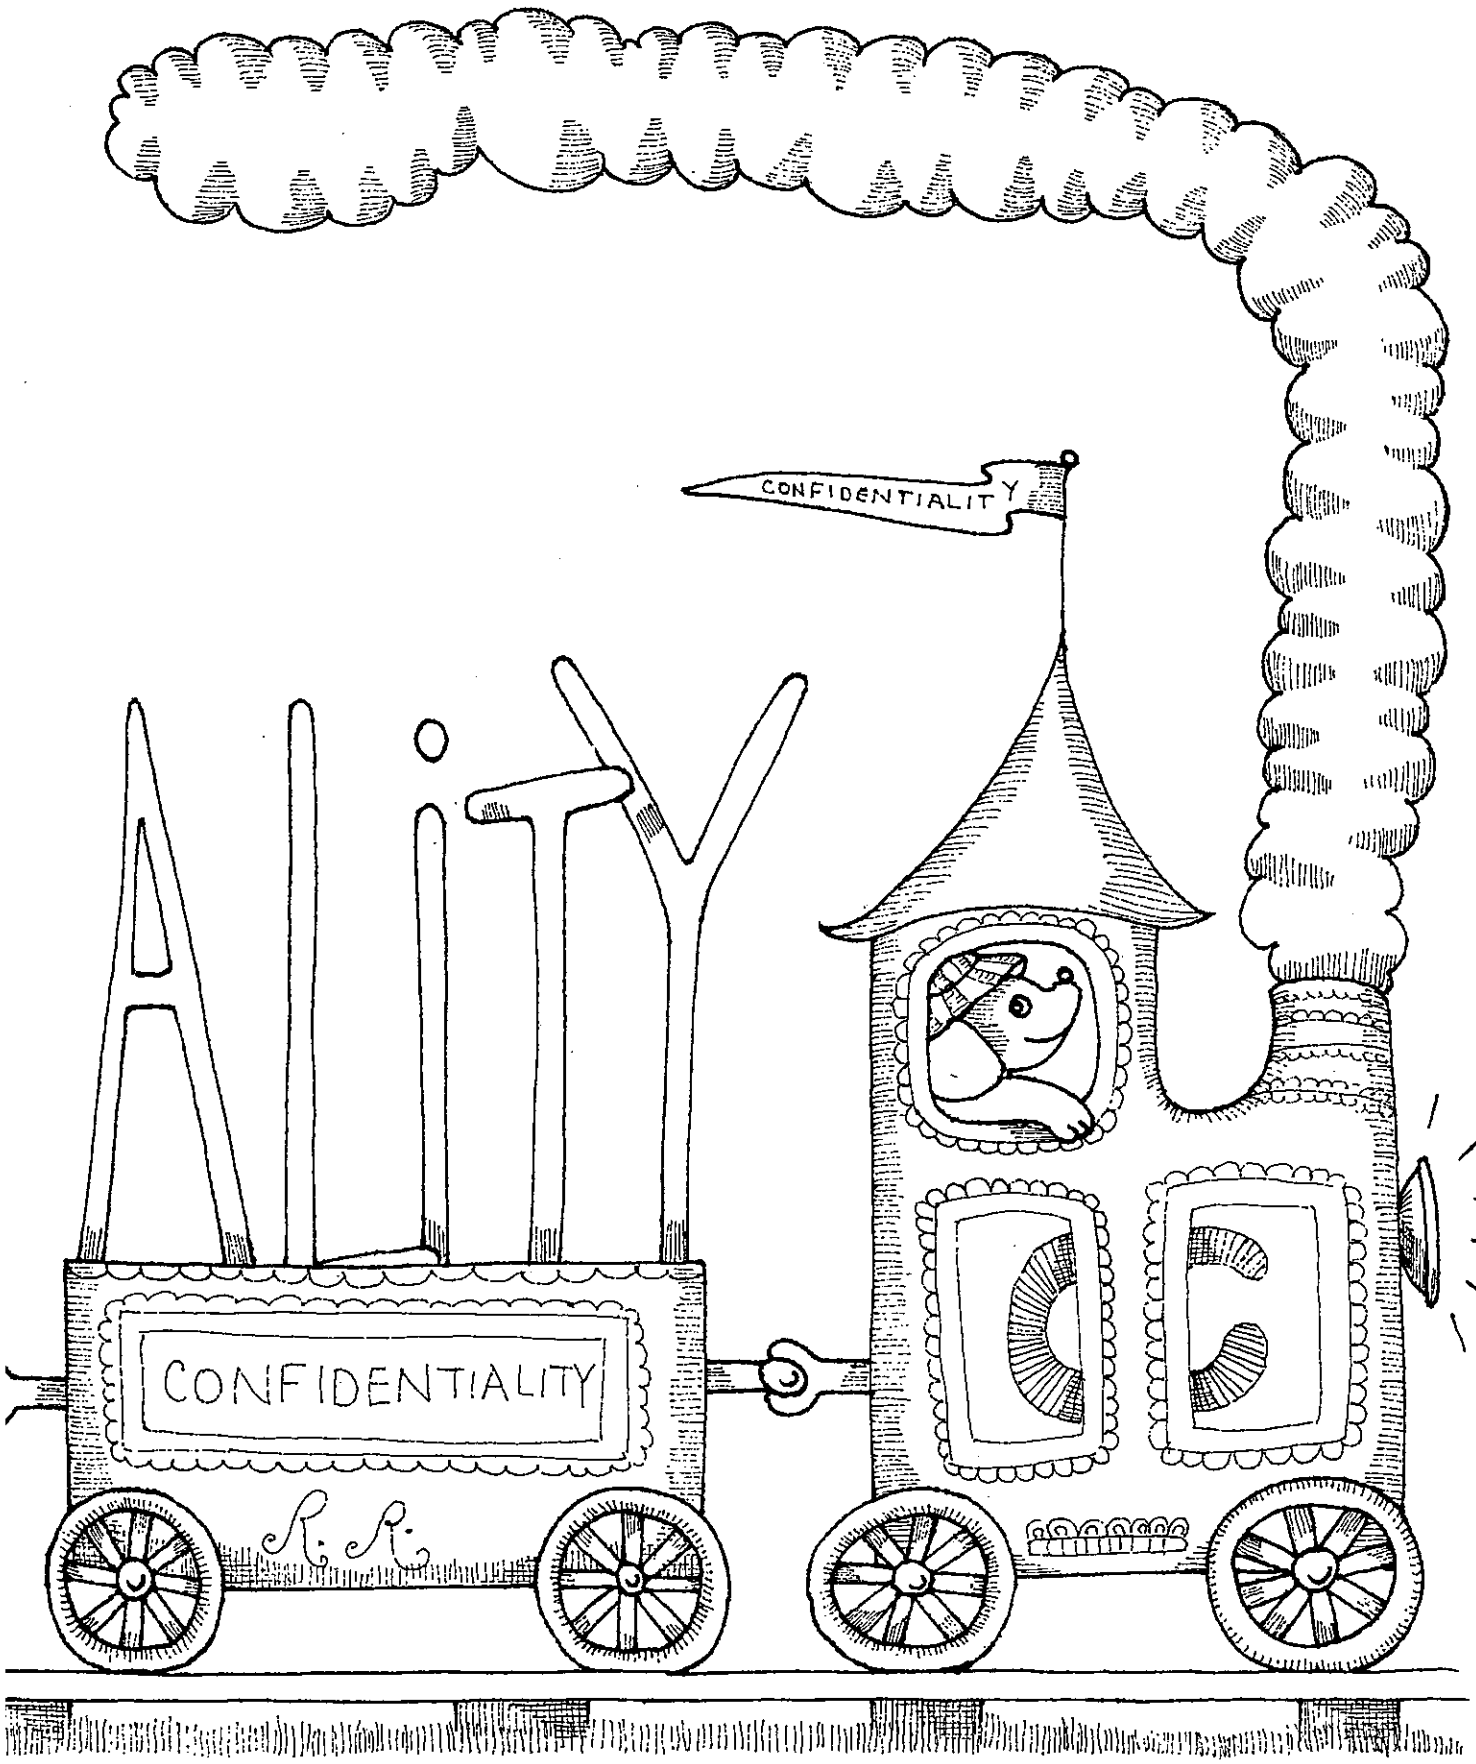

. . . אז יש משהו חשוב שאני רוצה שתדע לגבי זה

(Here comes the other big word we told you about.)

(הנה באה המילה הגדולה שהבטחנו.

ס-ו-....

(Whew!)

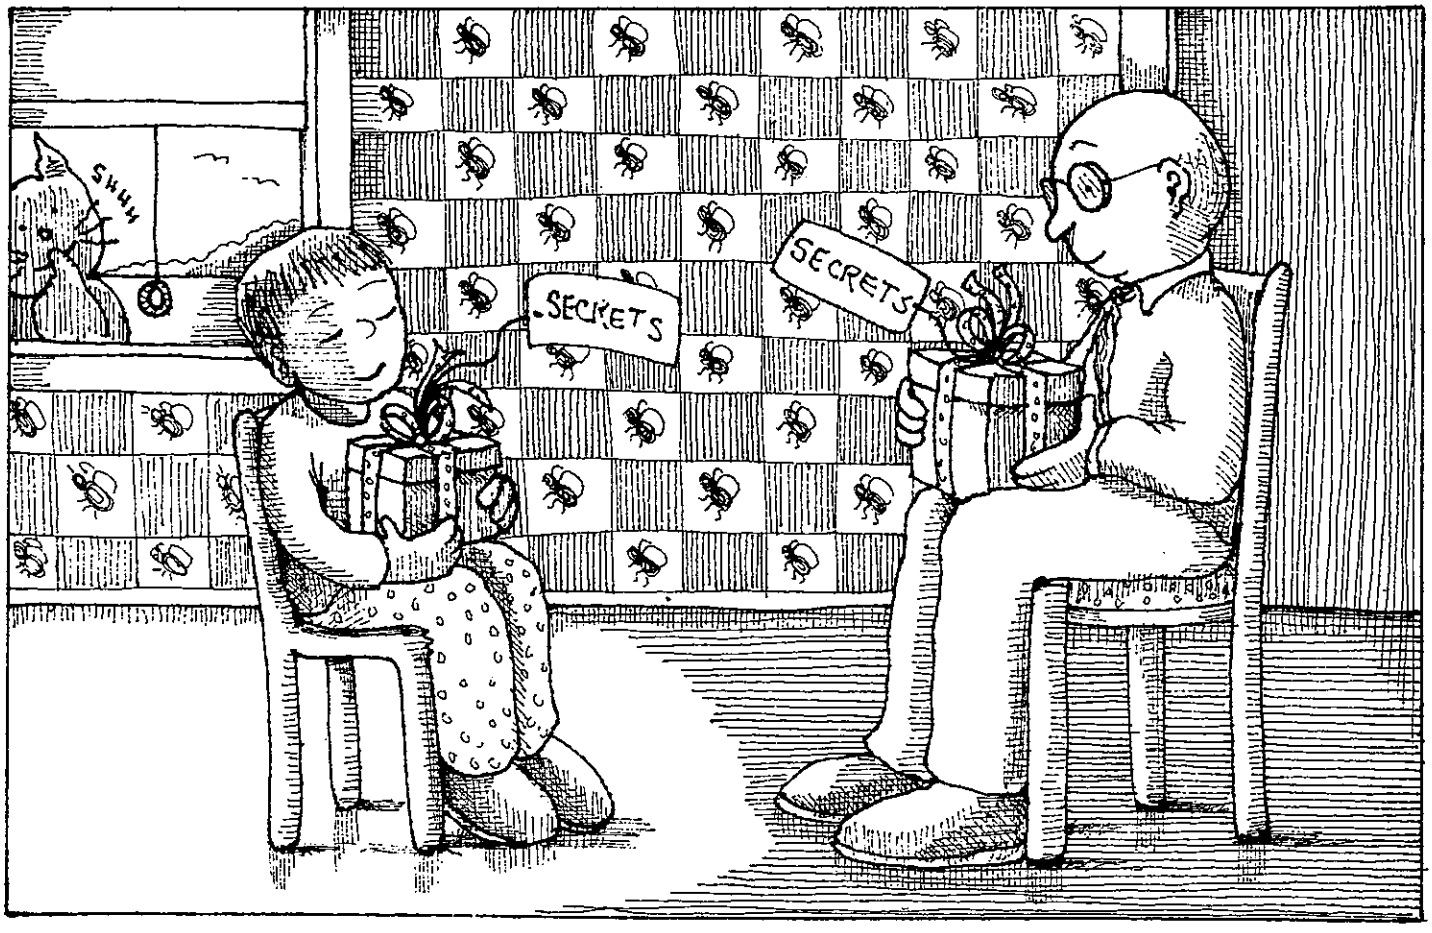

ד-י-ו-ת!

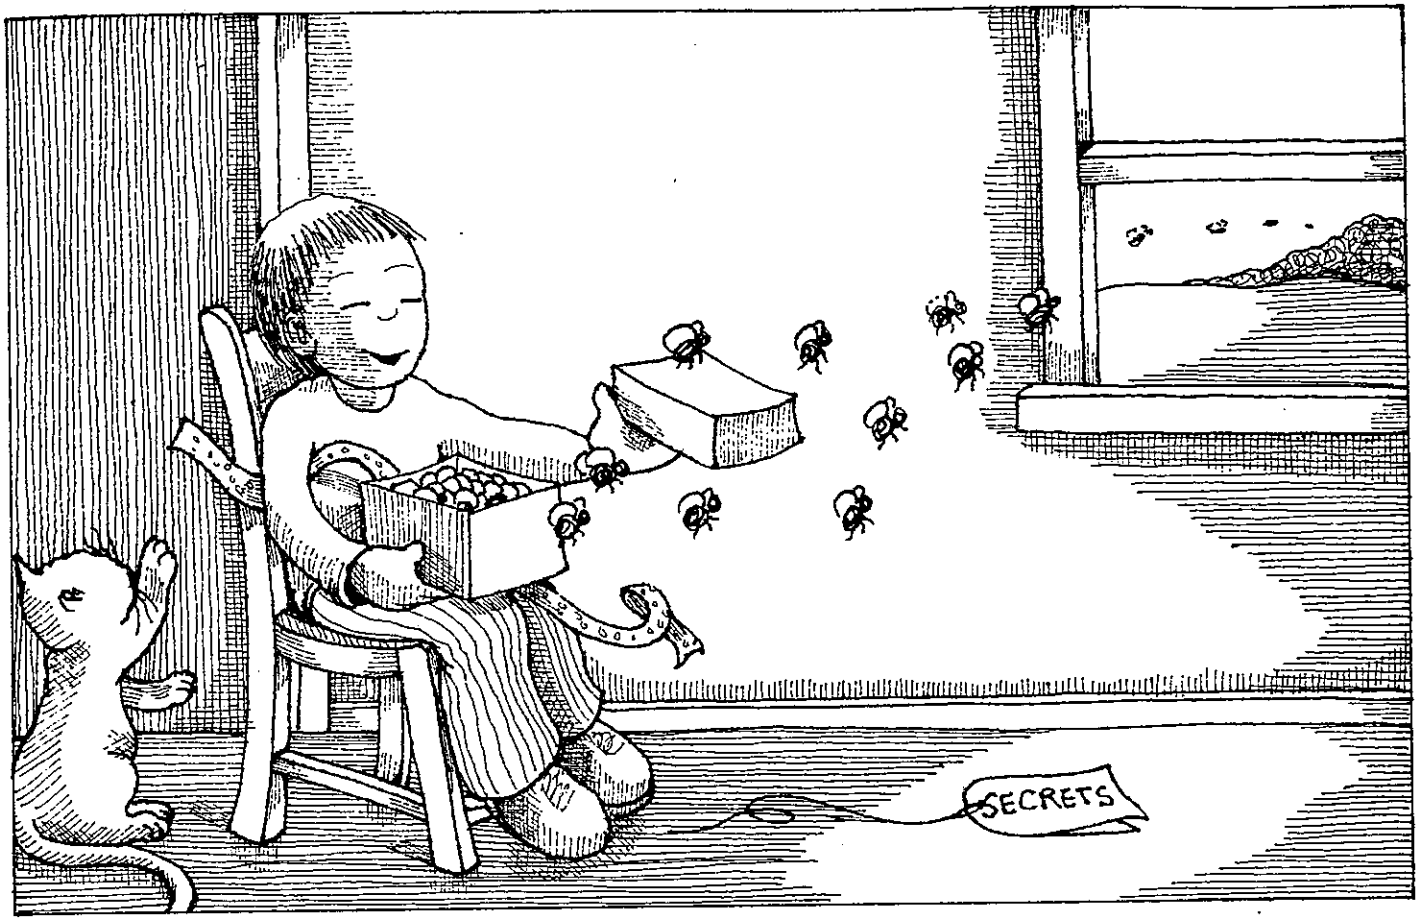

Confidentiality is like a one-way secret.

סודיות היא כמו סוד של כיוון אחד.

מטפלים לא מספרים לאף אחד על הרעיונות והרגשות שילדים עובדים עליהם בטיפול. הם שומרים אותם בסוד.

Therapists don't tell anyone the ideas or feelings kids work on. They keep them private.

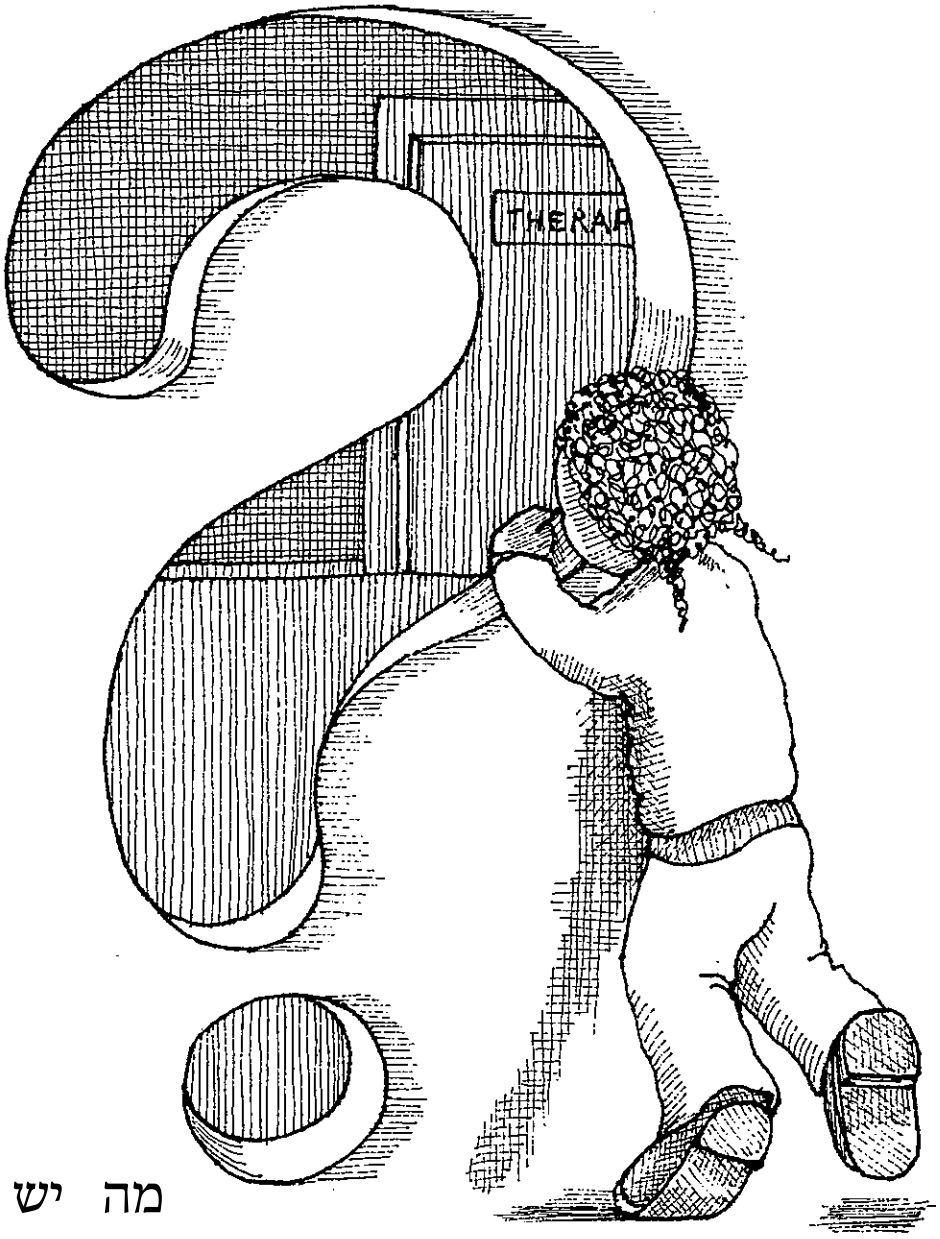

But

KIDS

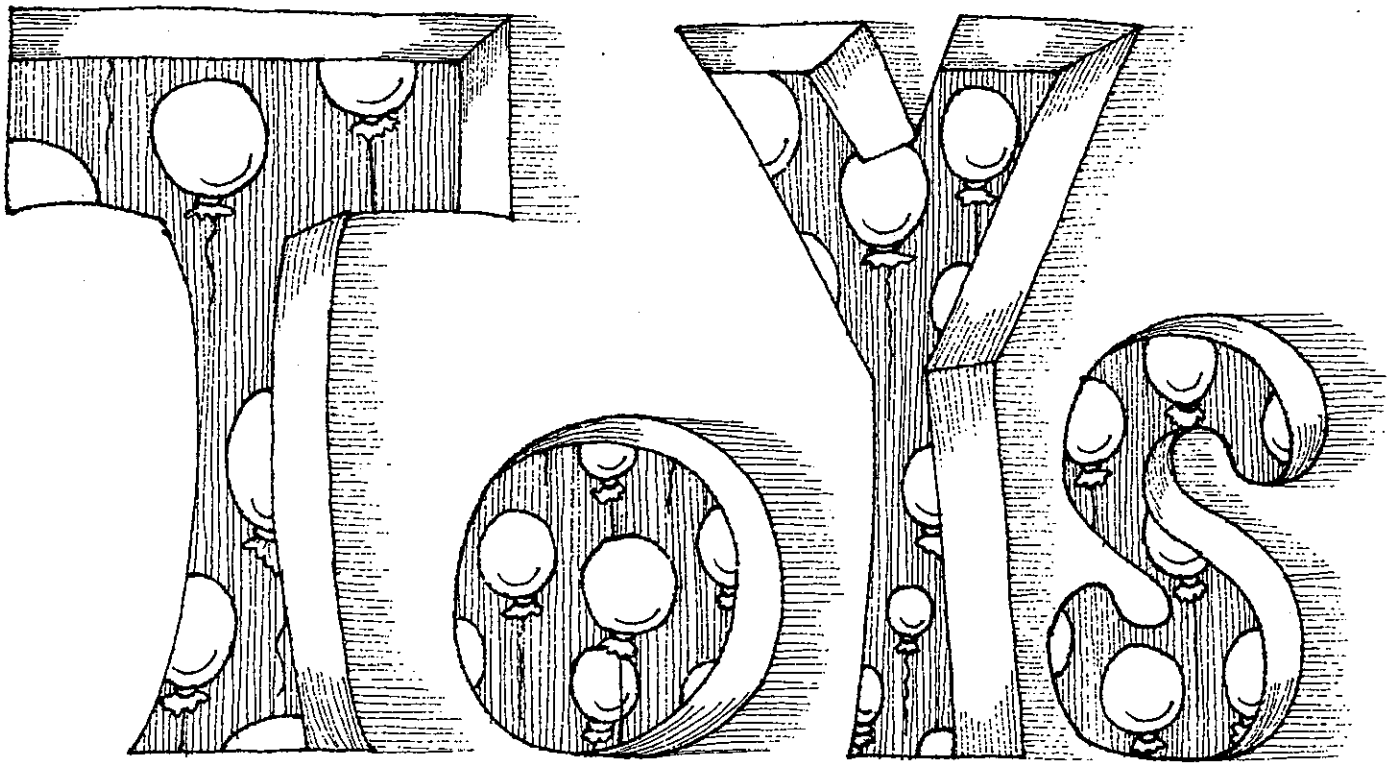

can talk about
them if they
want to.

אבל,
לילדים מותר לספר עליהם
אם הם רוצים.

WHAT'S IN A THERAPIST'S OFFICE

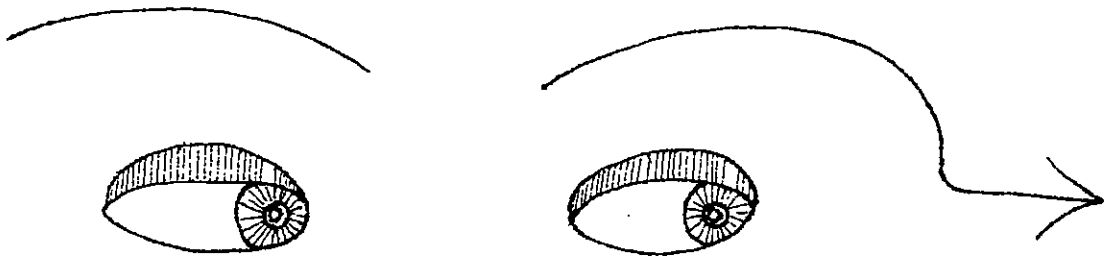

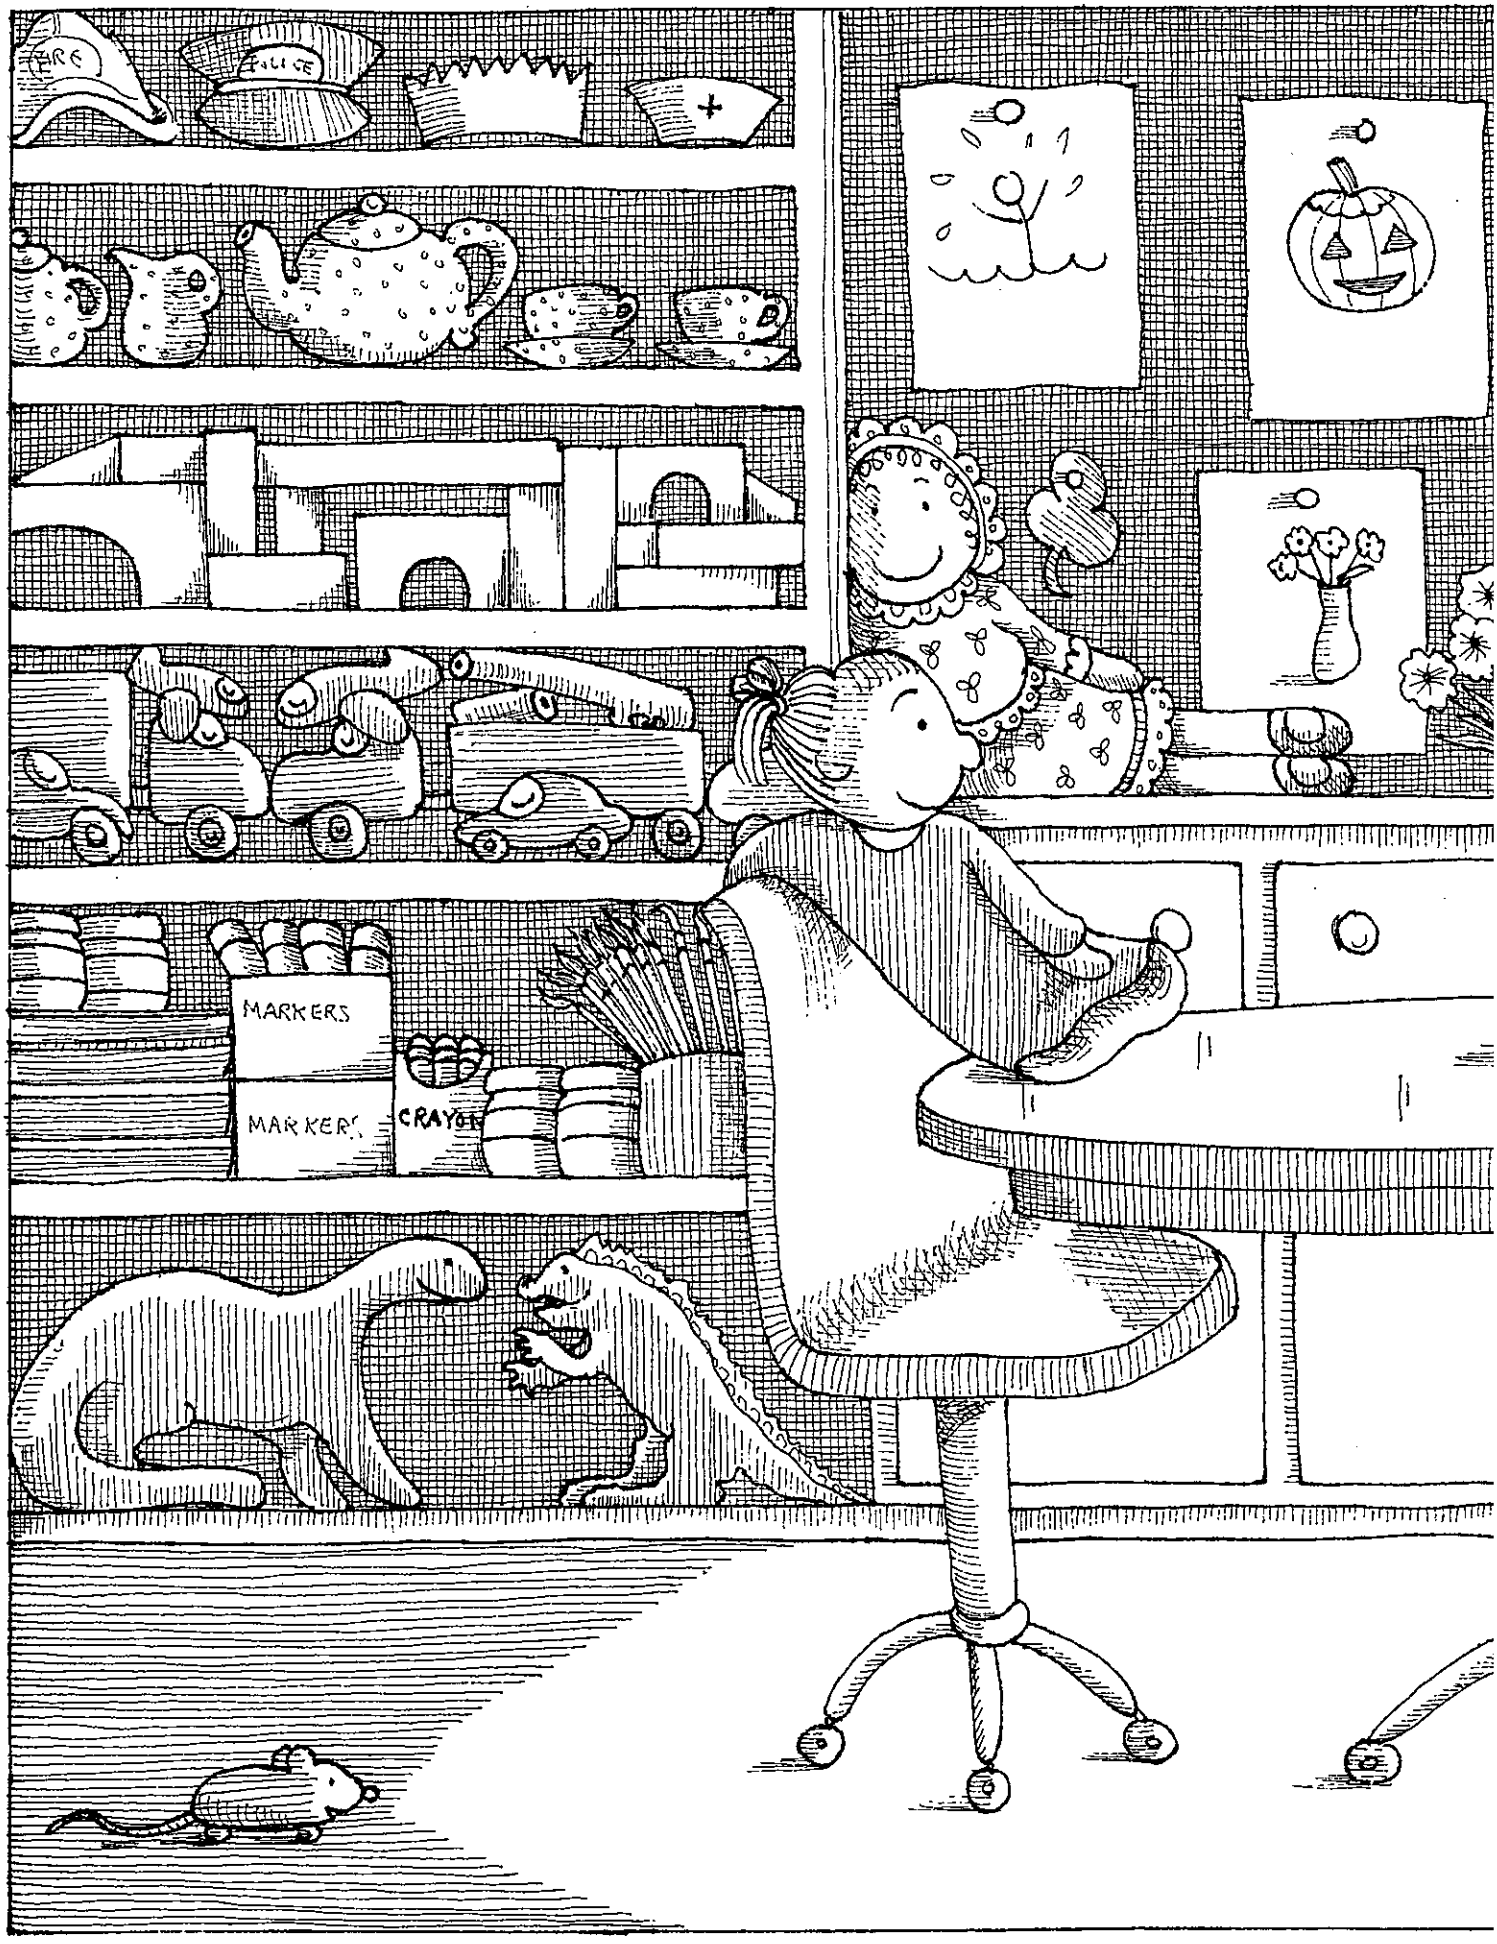

מה יש בחדר הטיפול?

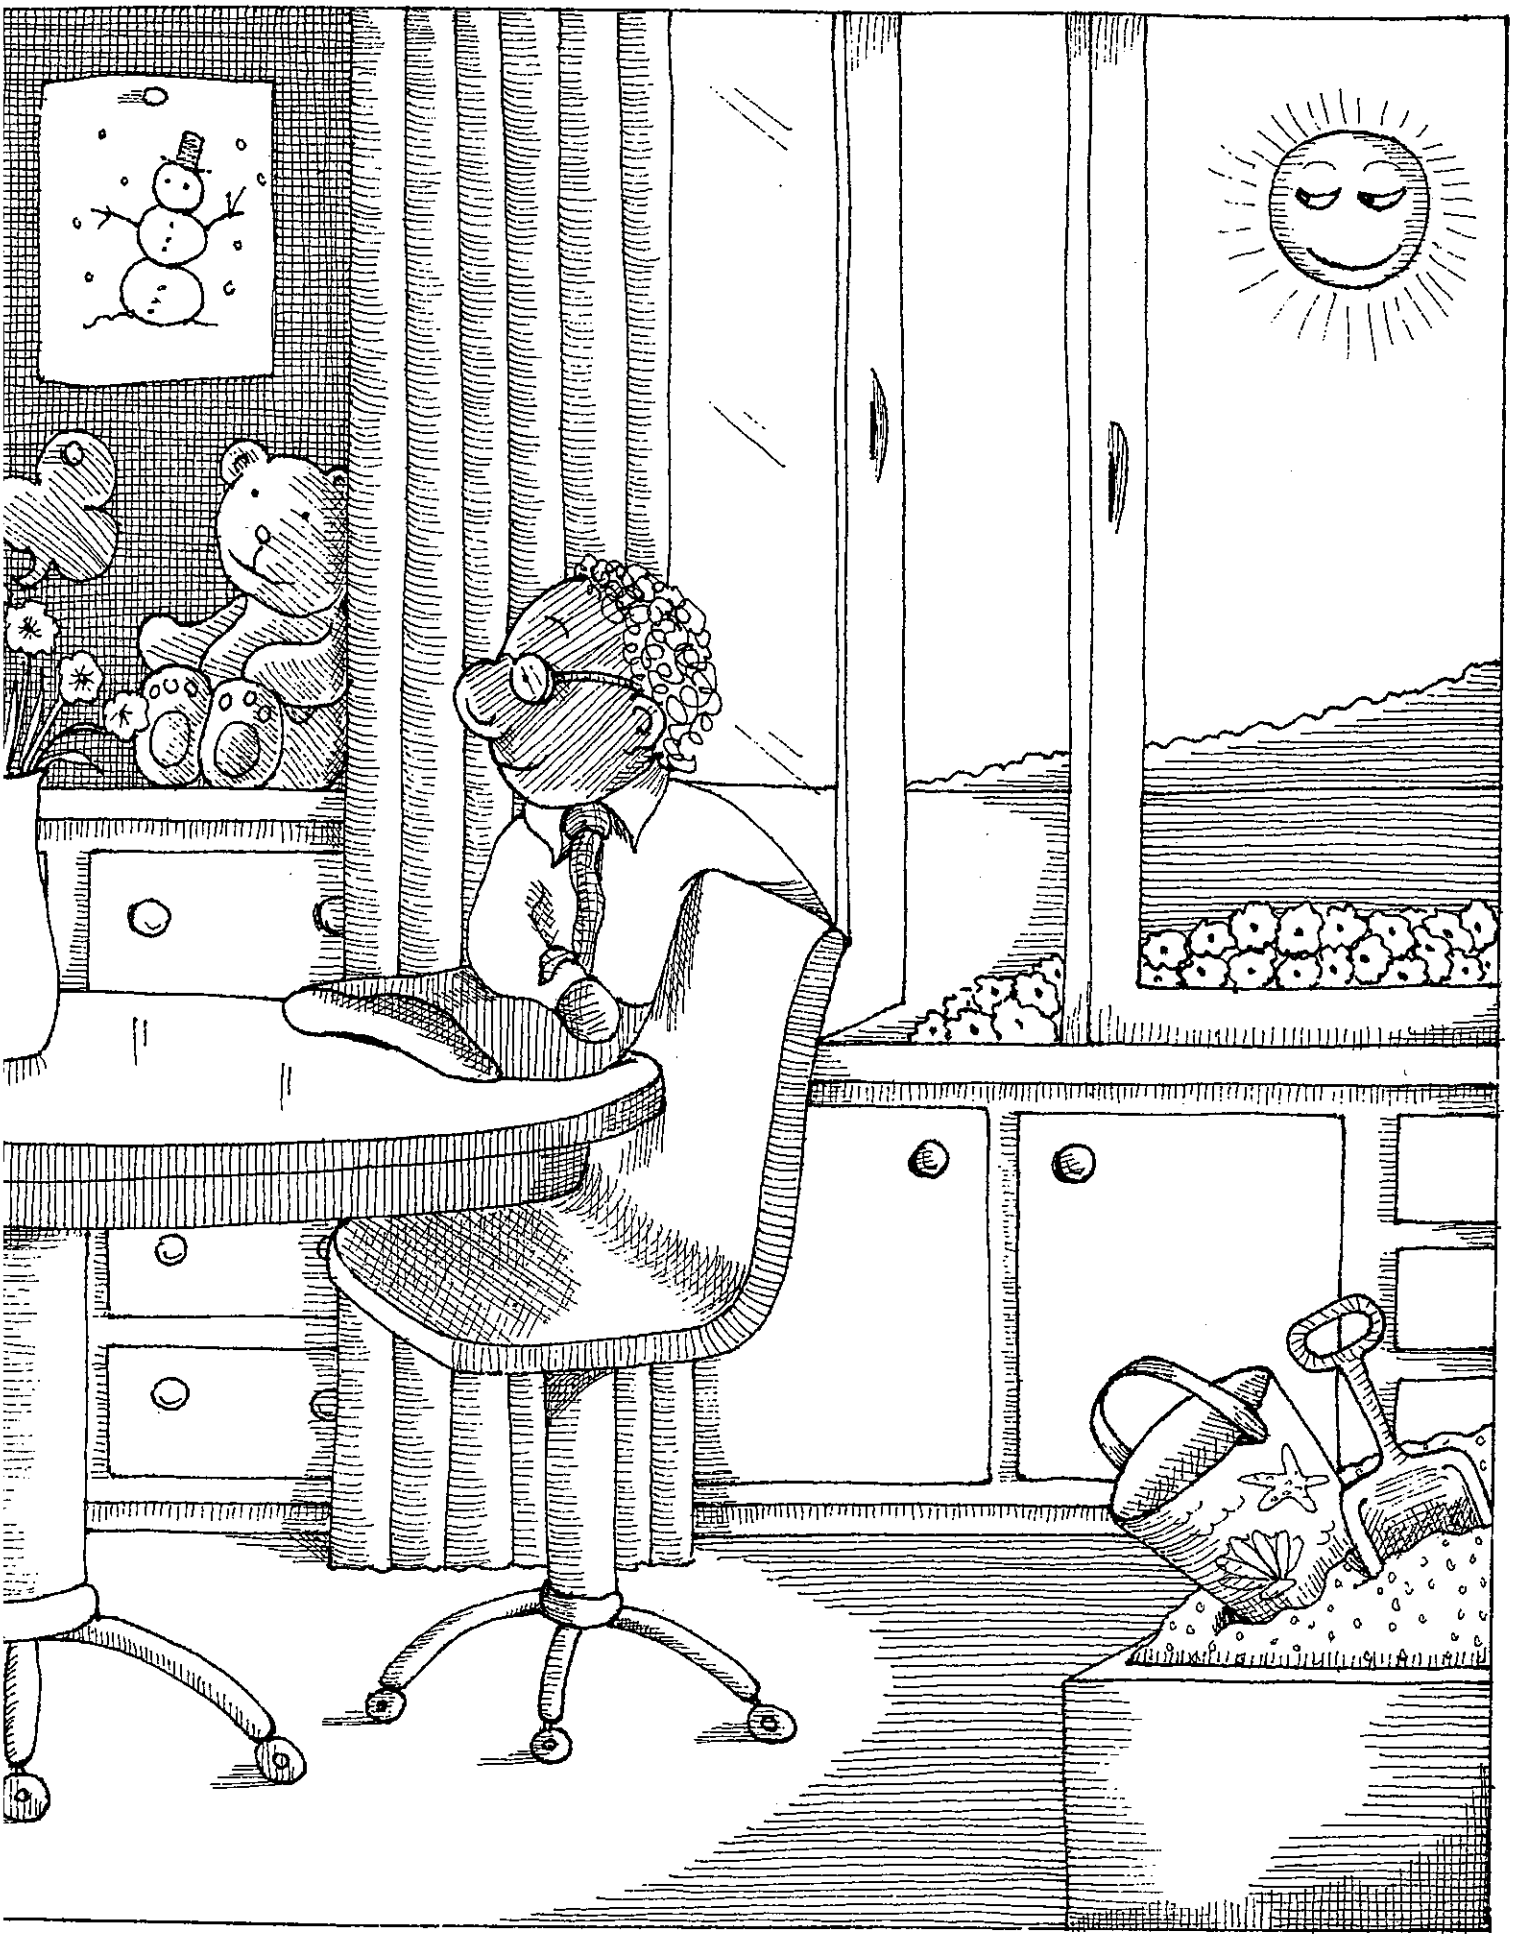

צעצועים, חומרים ליצירה, וגם כל מיני דברים אחרים.

and art supplies
and some other
things, too.

MARKERS
MARKERS
CRAYON

When kids play, the therapist can understand their feelings and their worries.

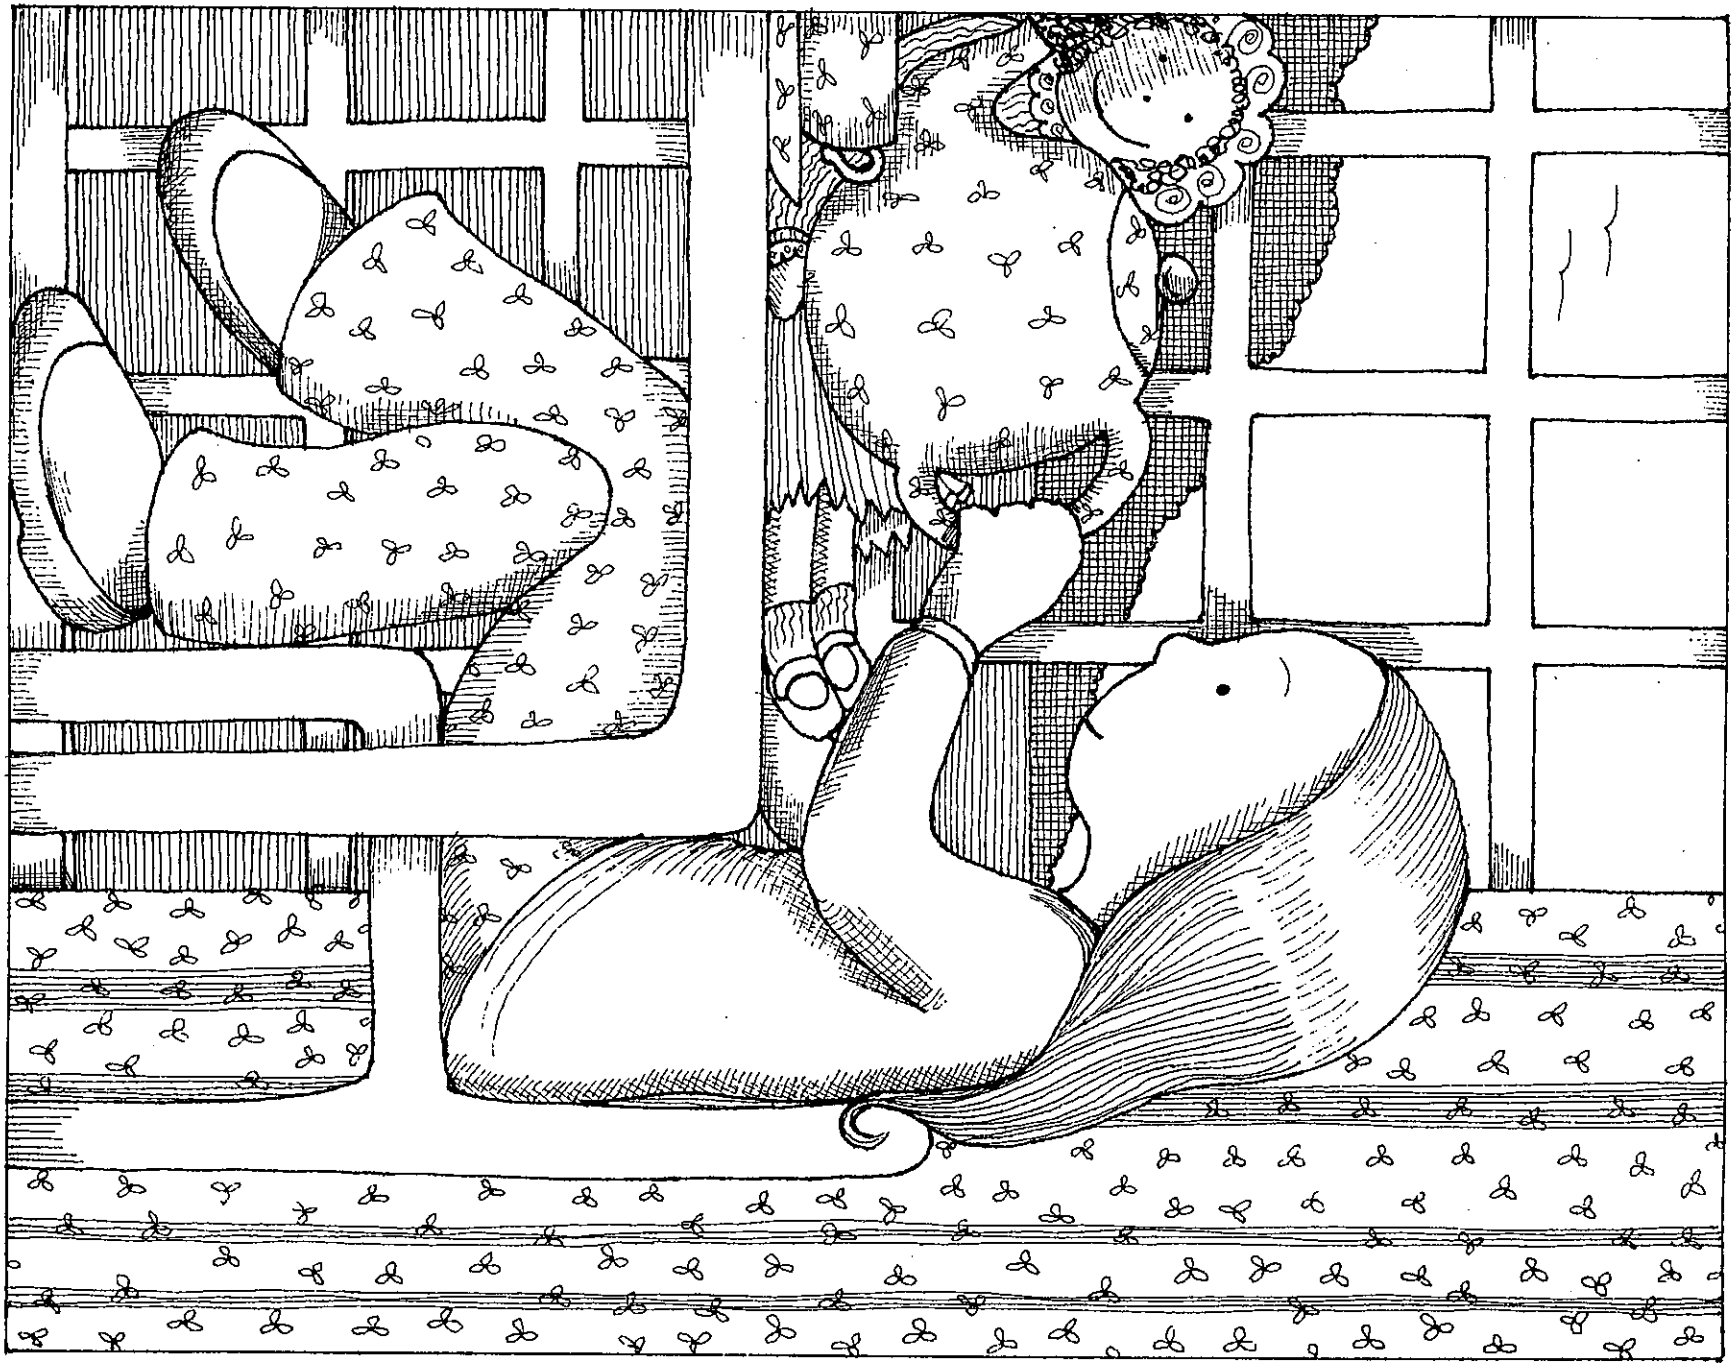

כשילדים משחקים המטפל מבין את הרגשות והדאגות שלהם.

That's because children play their feelings better than they talk about them.

כי ילדים יודעים לשחק את הרגשות שלהם יותר בקלות מאשר לדבר עליהם.

Child therapists help them understand their feelings while they play.

מטפלים של ילדים עוזרים לילדים להבין את הרגשות שלהם, בזמן שהם משחקים אותם.

Children's problems seem to get better when they understand their feelings.

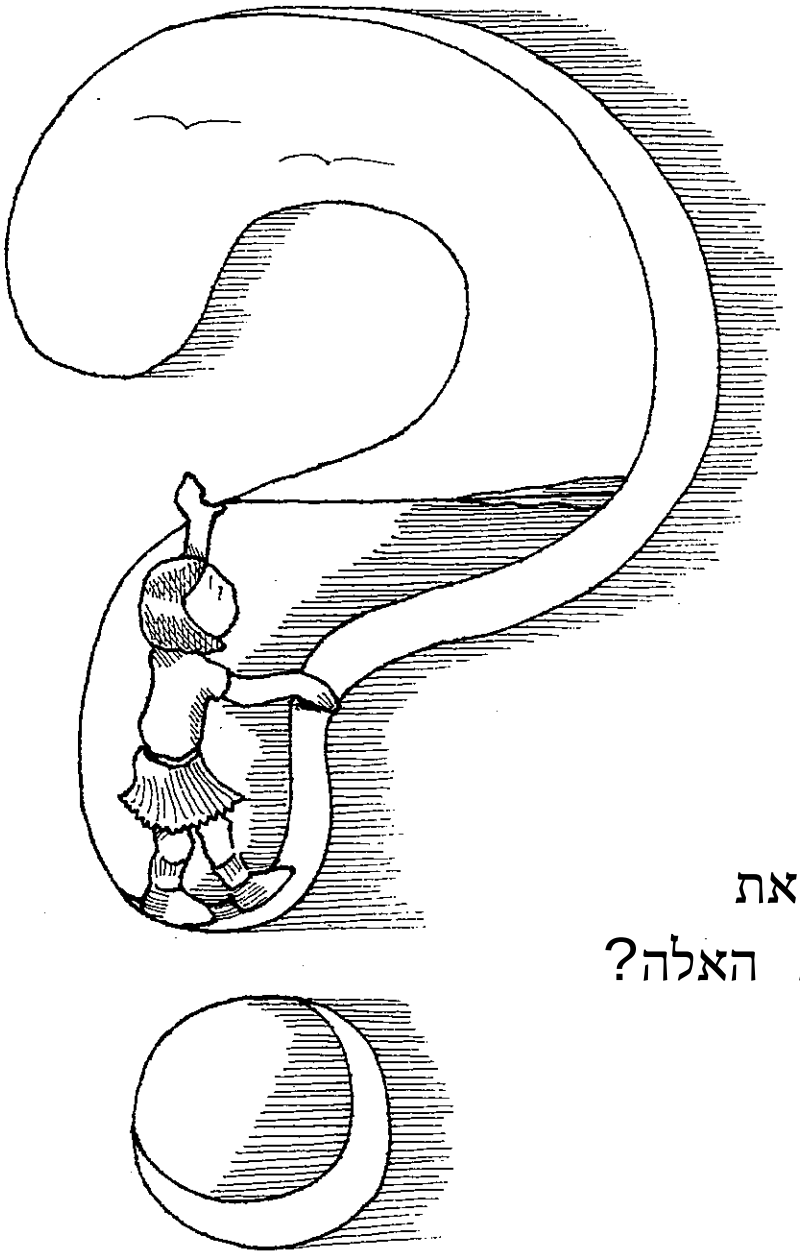

נראה שהבעיות של ילדים משתפרות כשהם מצליחים להבין את הרגשות שלהם.

That's because kids sometimes have feelings they don't know they have.

כי לפעמים לילדים יש רגשות שהם אפילו לא ידעו שיש להם.

Really?
באמת?
I think so.
ככה נראה לי.

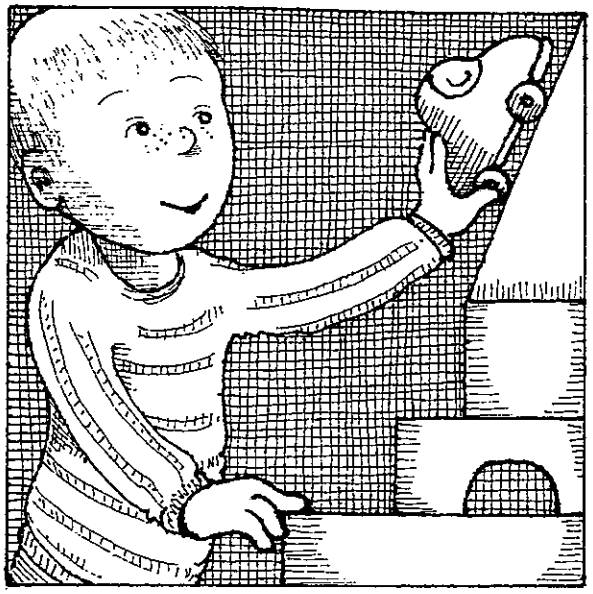

So, how do they find out about these feelings?

אז איך
מגלים את
הרגשות האלה?

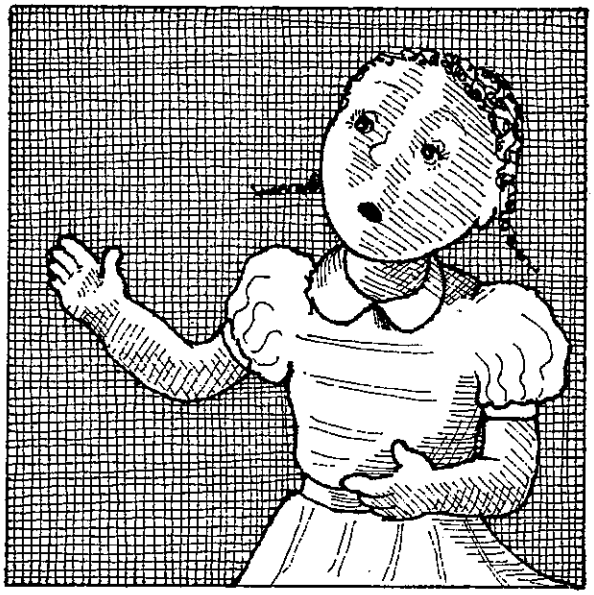

They play

משחקים

And talk

ומדברים

And draw...

ומציירים

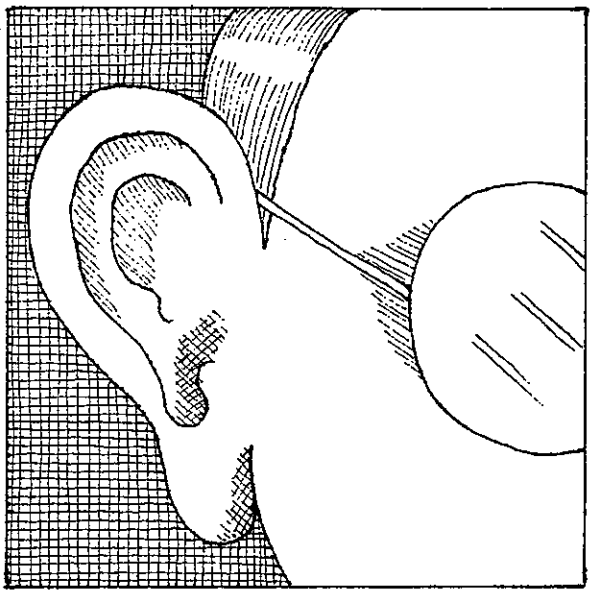

And the therapist:

והמטפלת:

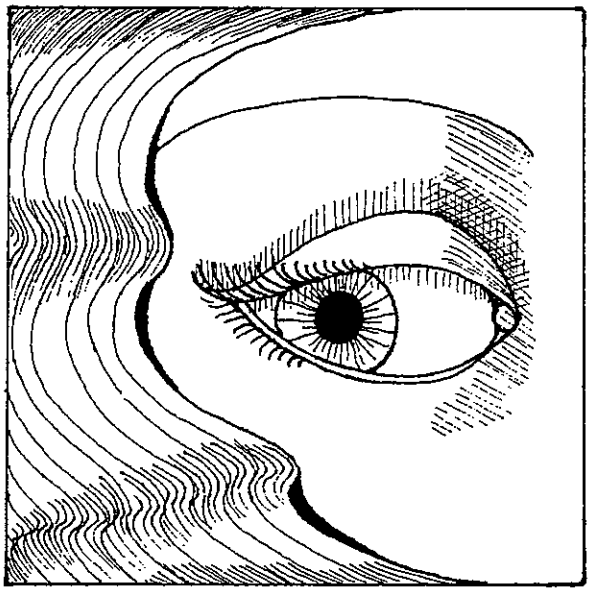

1. Listens

1. מקשיבה

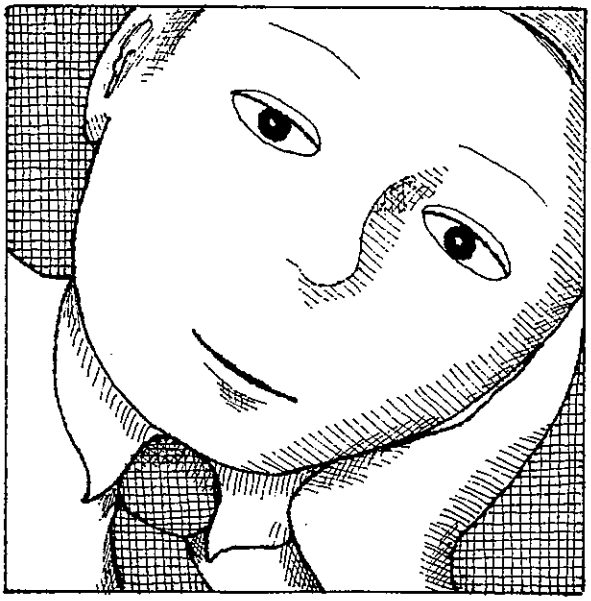

2. Watches

2. מתבוננת

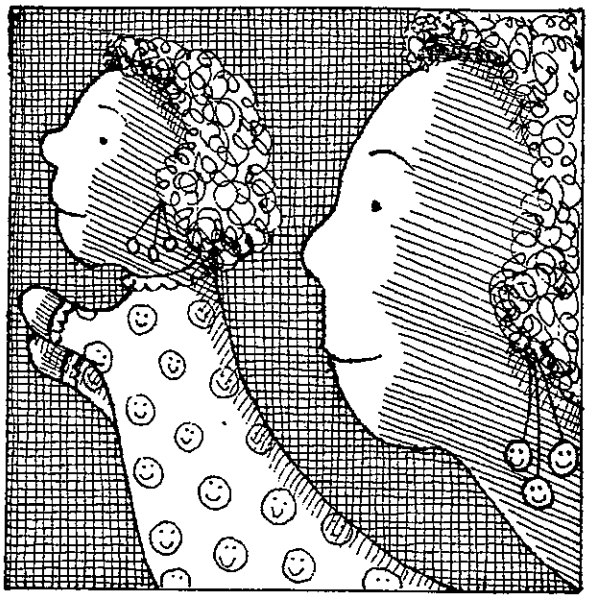

3. Under-stands

3. מבינה

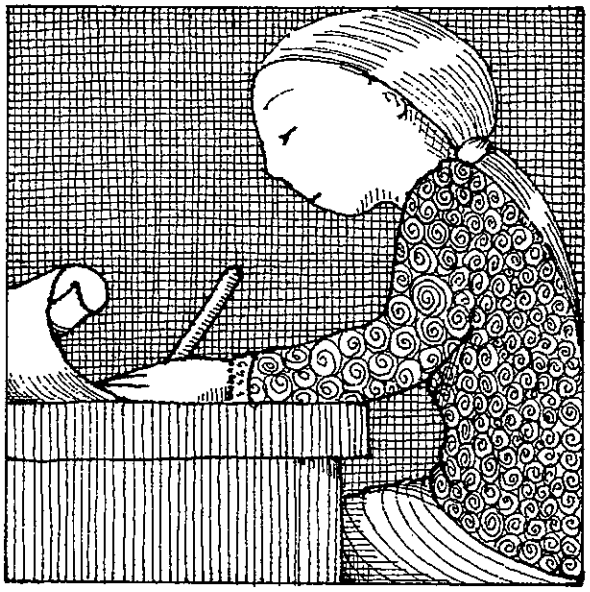

4. Sometimes plays, too

4. לפעמים משחקת גם

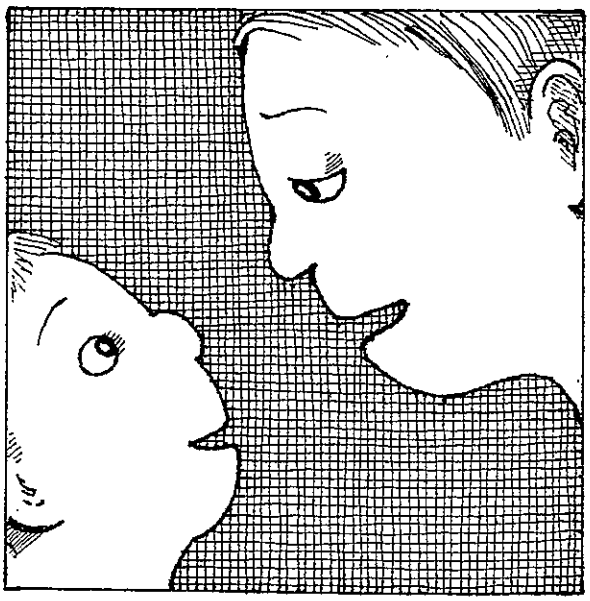

5. Figures out the feelings and

5. מפענחת רגשות, ו...

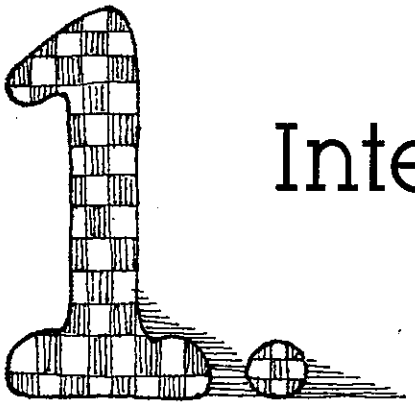

6. Talks with kids about them.

6. משוחחת עם ילדים עליהם

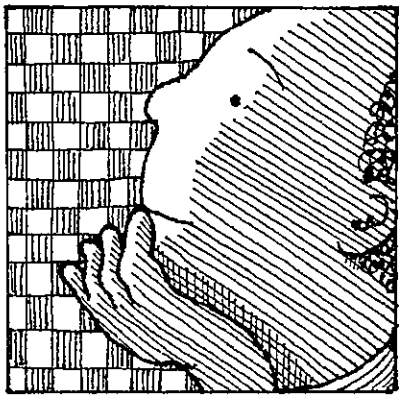

How do kids feel doing all this?

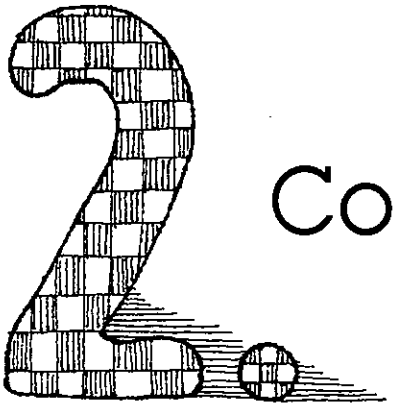

מה ילדים מרגישים כשעושים את כל הדברים האלה?

Interested

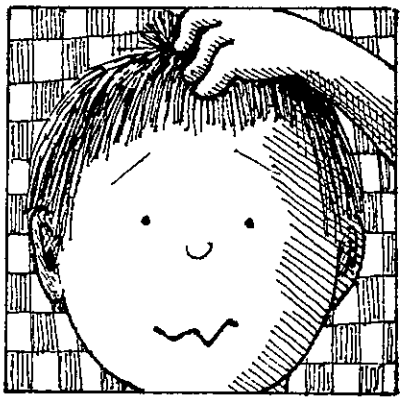

1. סקרנים

Confused

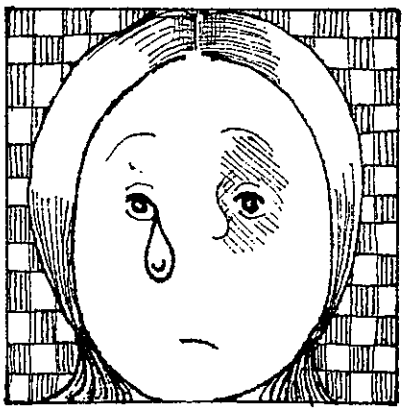

2. מבולבלים

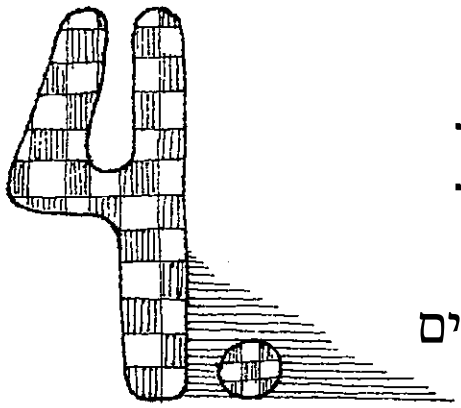

Sad

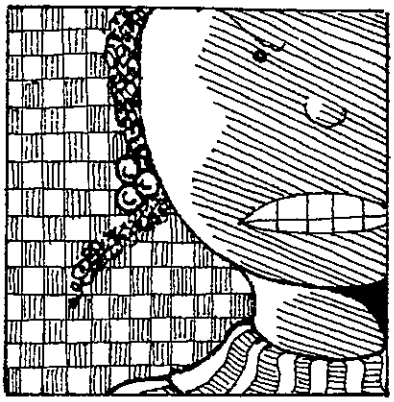

3. עצובים

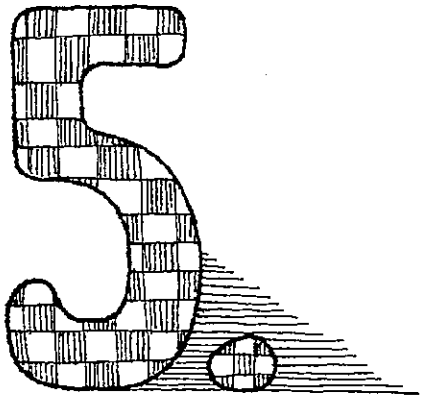

Mad

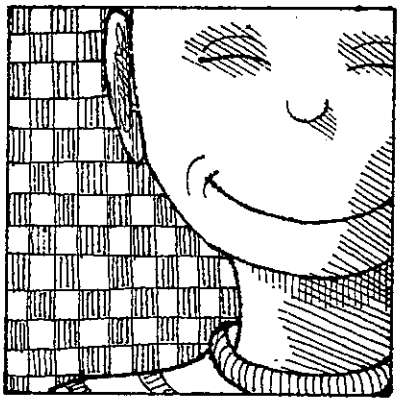

4. כועסים

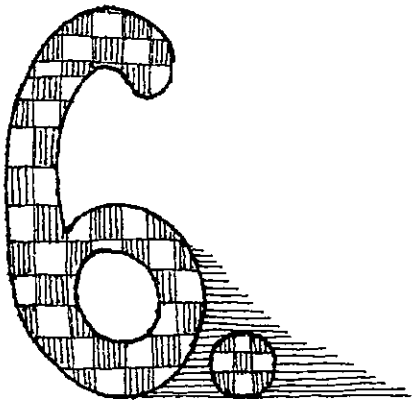

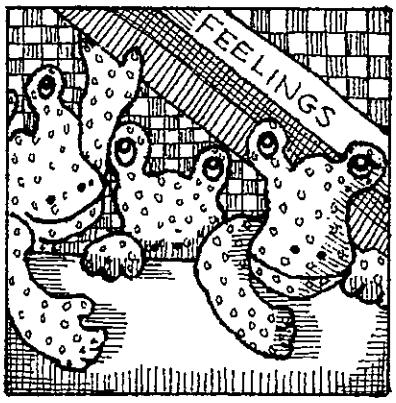

Glad

5. שמחים

Lots of other feelings, too.

6. וכל מיני רגשות אחרים גם.

Therapists and kids talk and talk about these feelings. Sometimes it takes a long time.

מטפלים וילדים מדברים ומדברים על כל הרגשות האלה לפעמים זה לוקח הרבה זמן.

And sometimes children
don't like to listen
to the therapist—

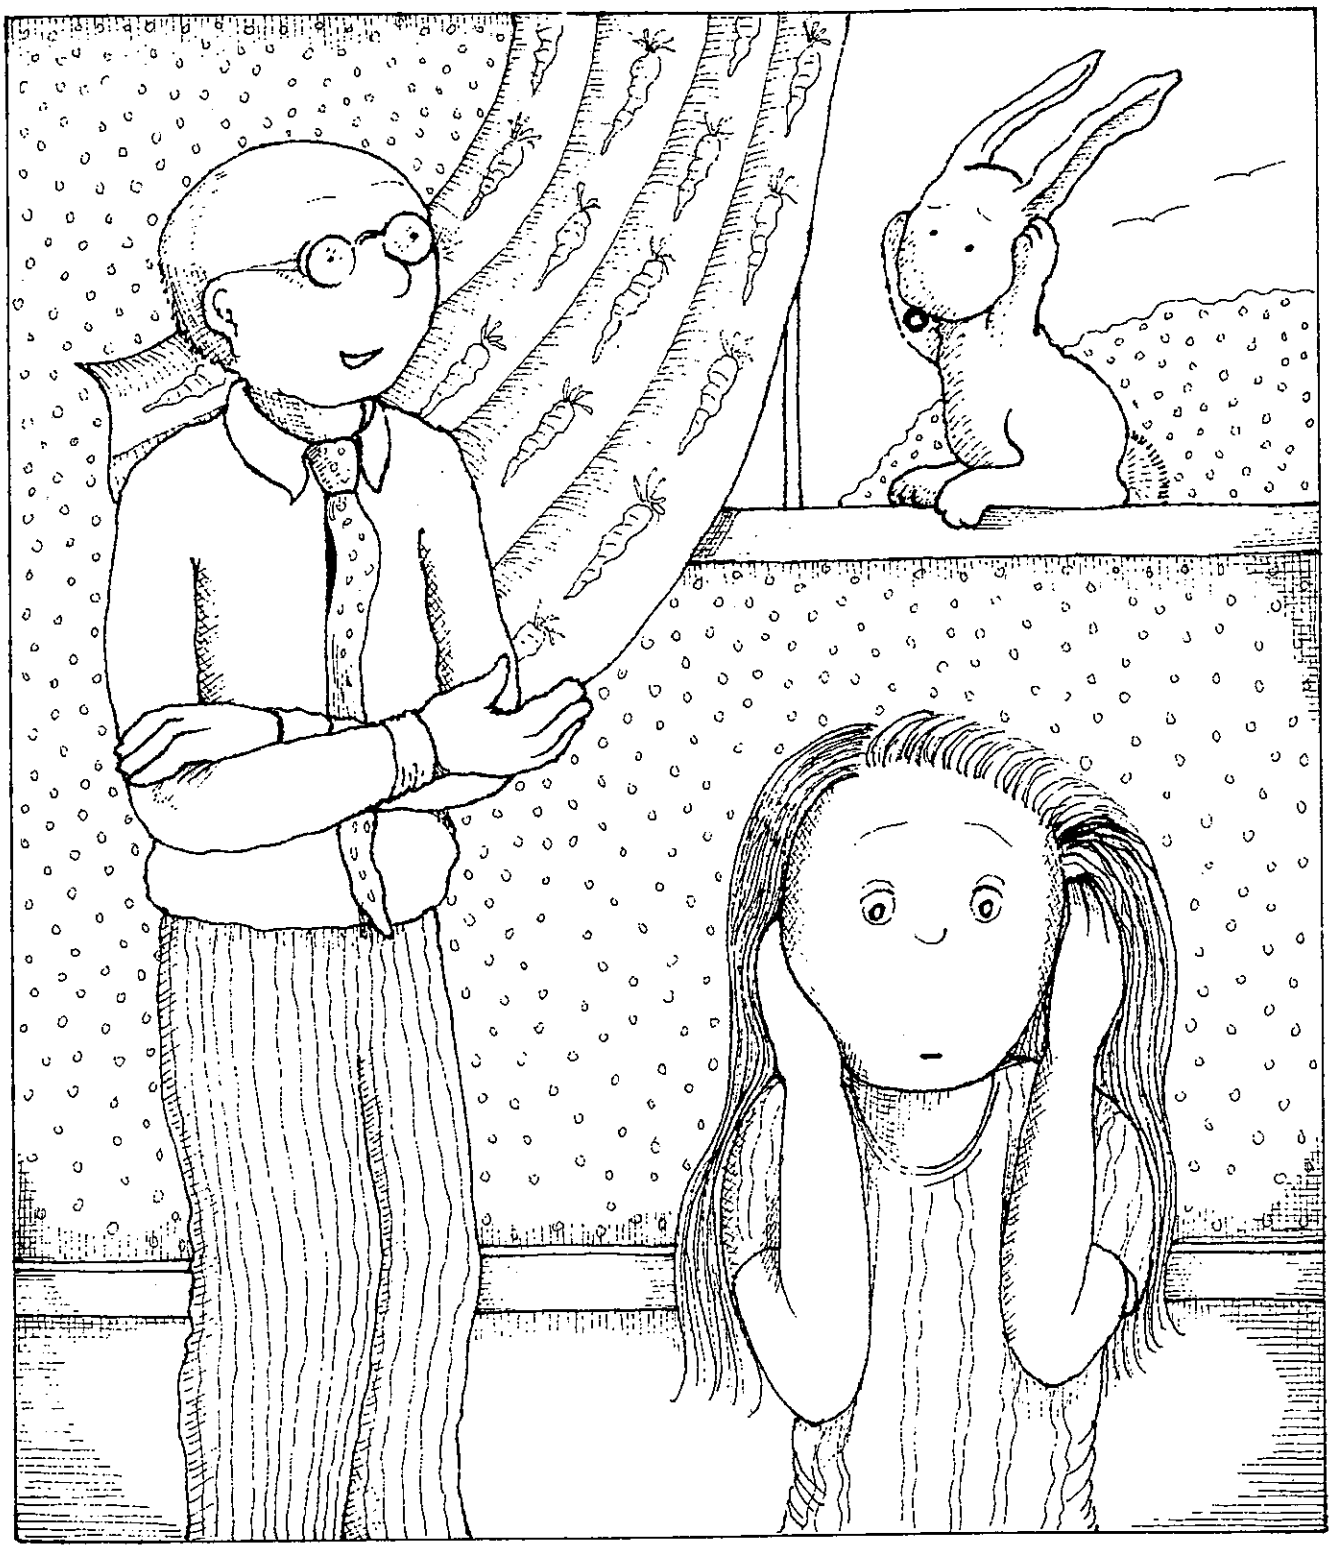

ולפעמים, הילדים לא אוהבים להקשיב למטפל.

especially when
they are mad or
sad or confused.

במיוחד כשהם מרגישים כועסים או עצובים או מבולבלים.

Then, they don't like
what the therapist
has to say.

ואז, הם לא כל כך אוהבים את מה שהמטפל אומר

But that's okay . . .

אבל זה בסדר...

Because the more kids talk about any of these feelings, their problems get smaller

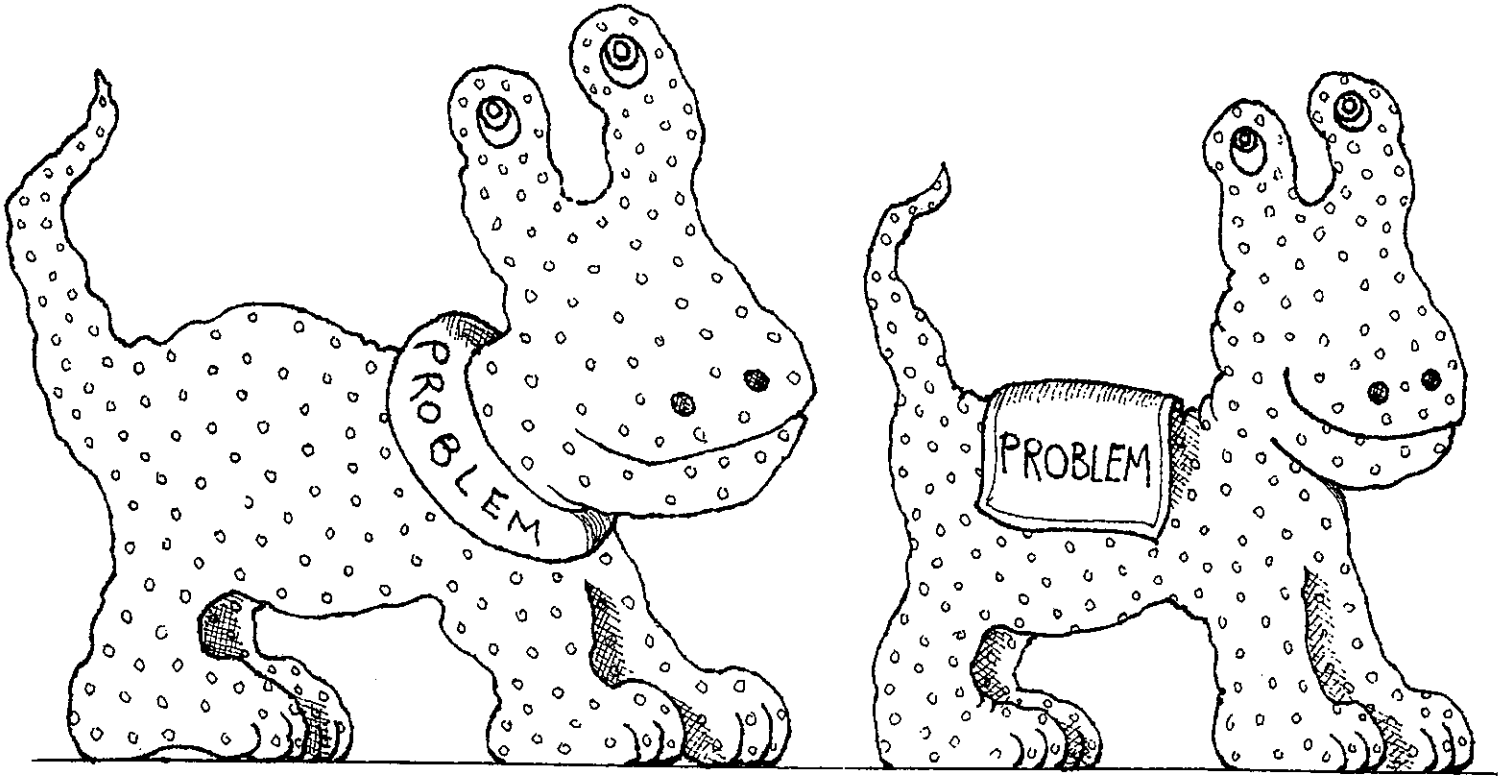

כי ככל שילדים מדברים
על הרגשות האלה,
הבעיות לשהם נהיות
יותר
ויותר
ויותר
קטנות

and

smaller

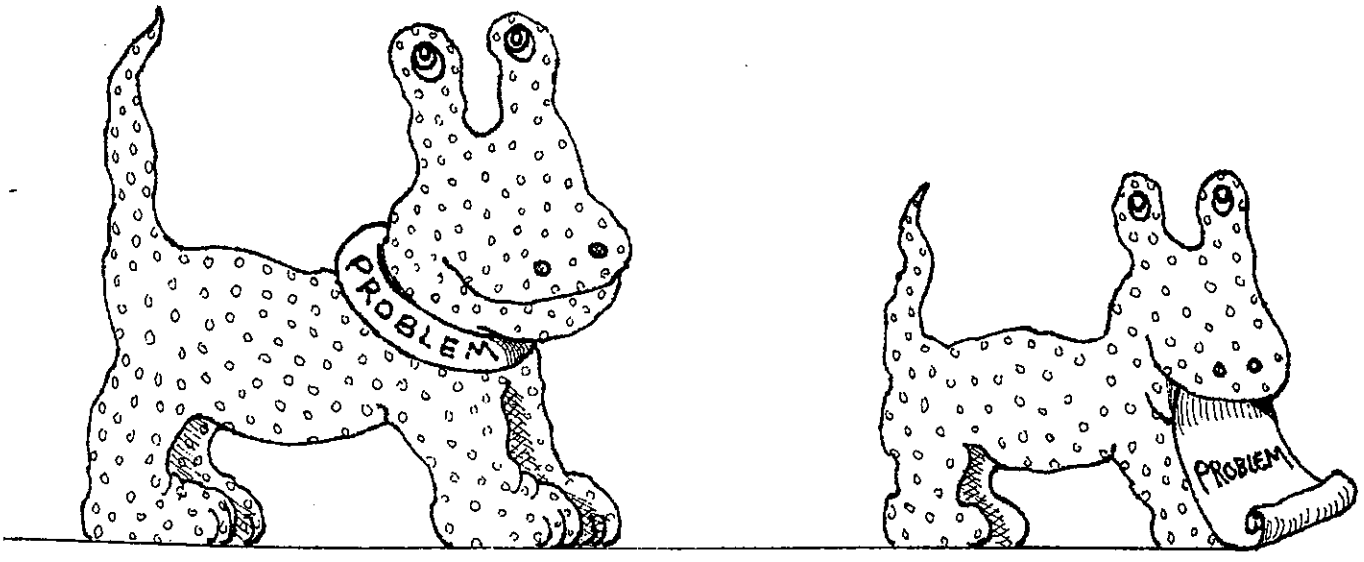

and

smaller.

Getting better is hard and it takes a long time.

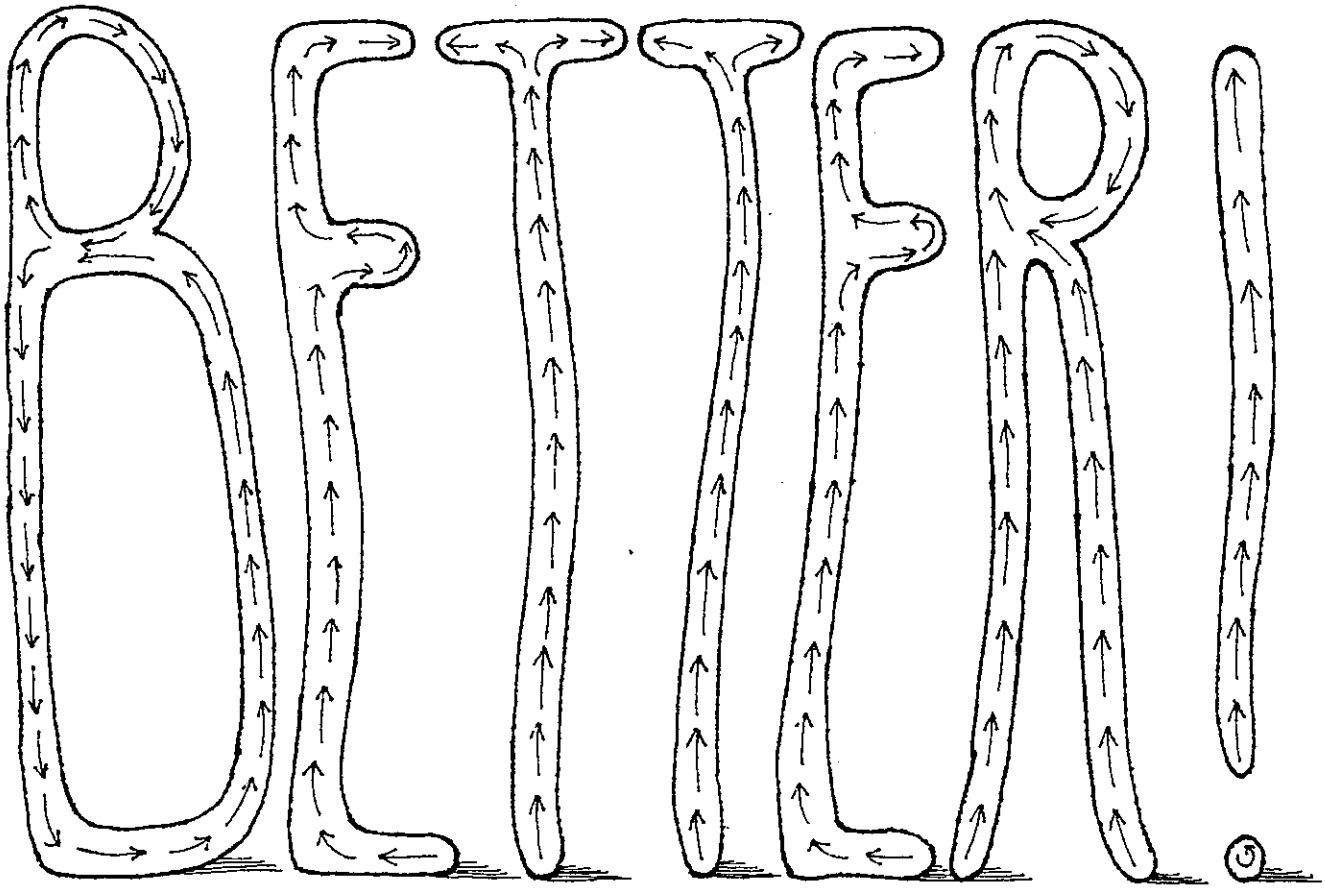

זה יכול להיות ממש קשה לגרום
לבעיות להשתפר, וזה יכול לקחת
הרבה זמן.

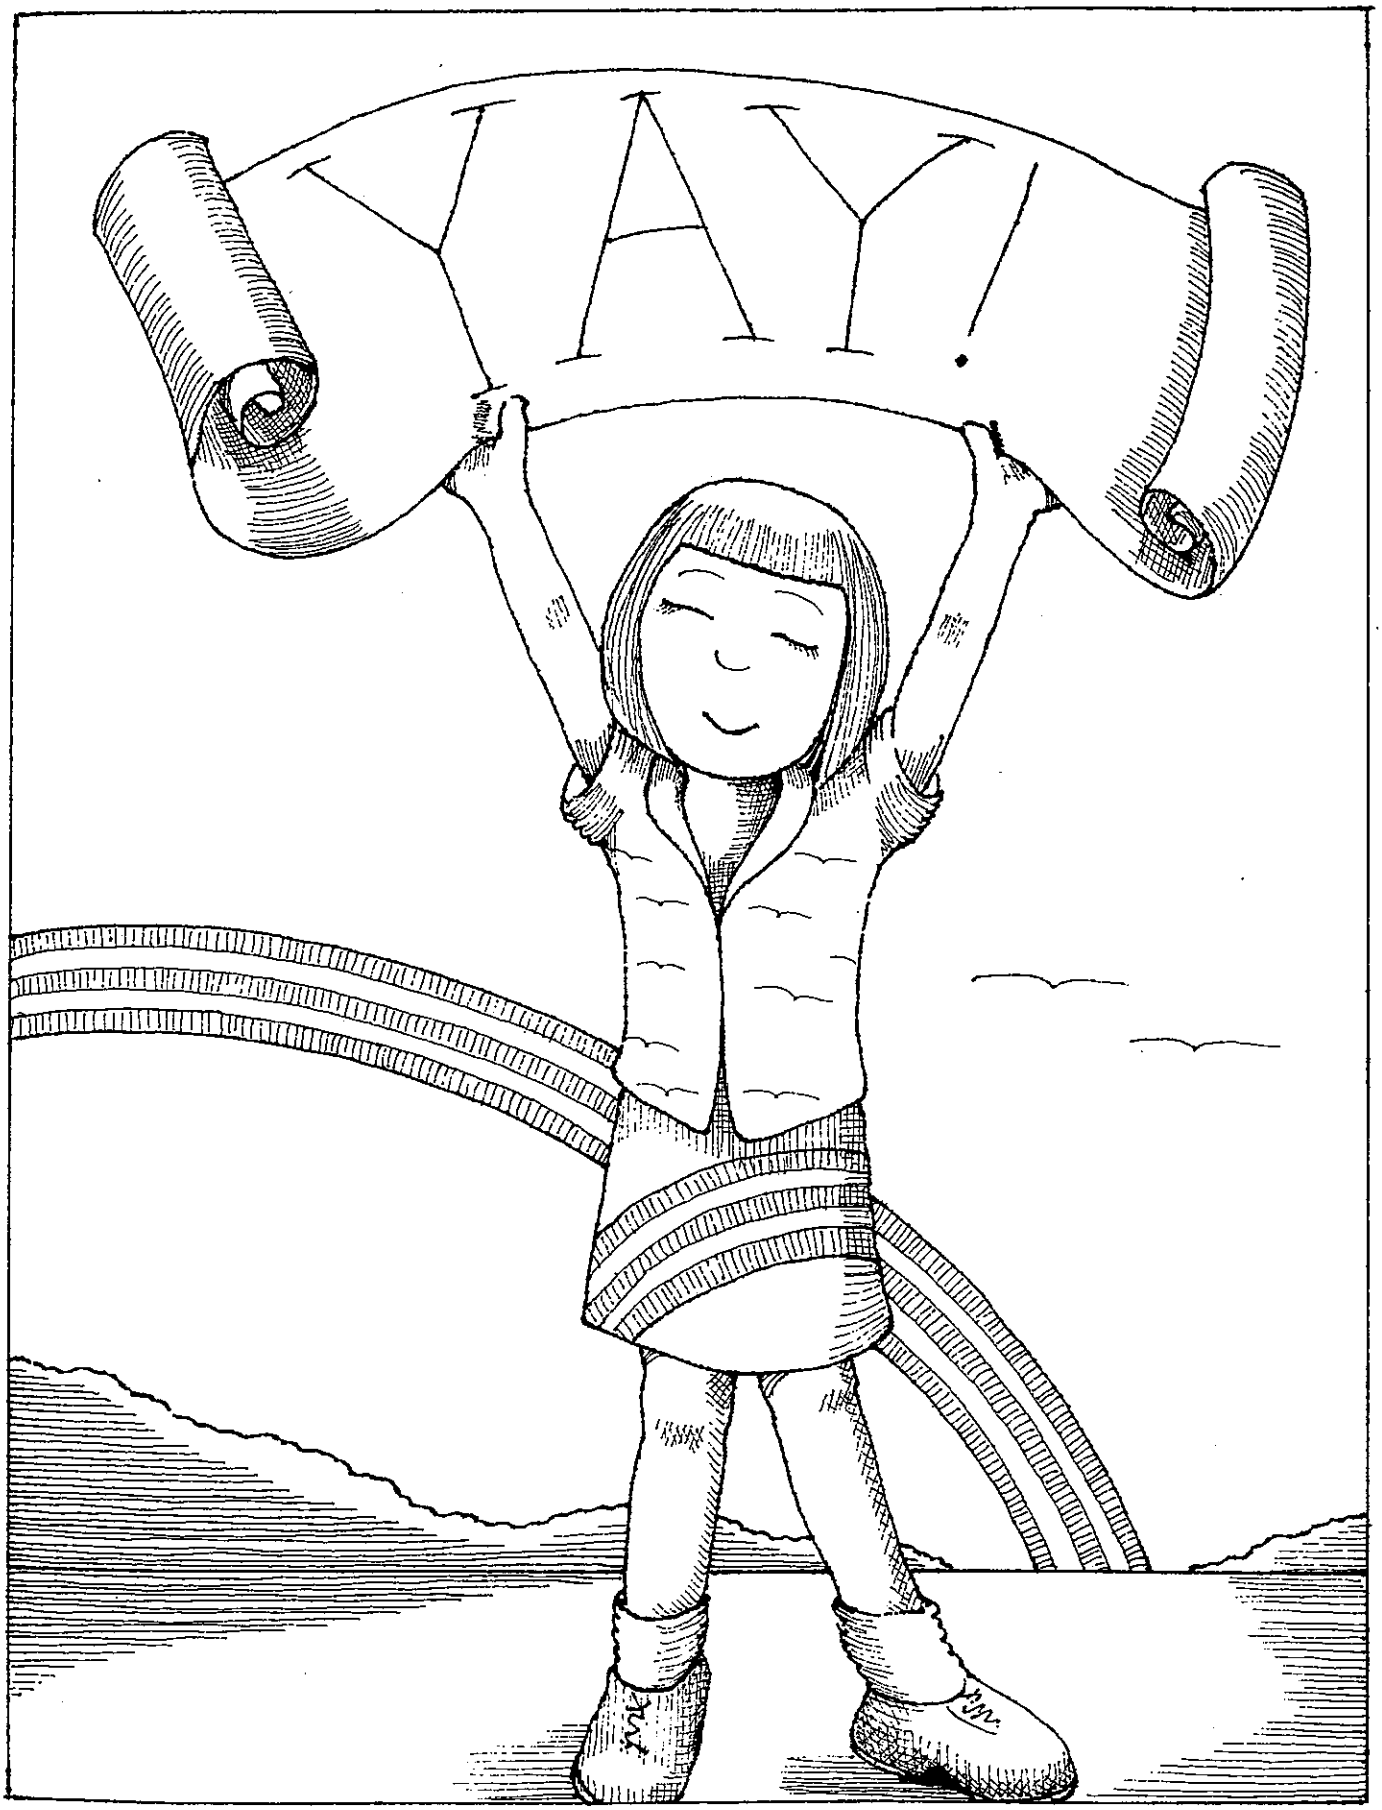

But, finally,

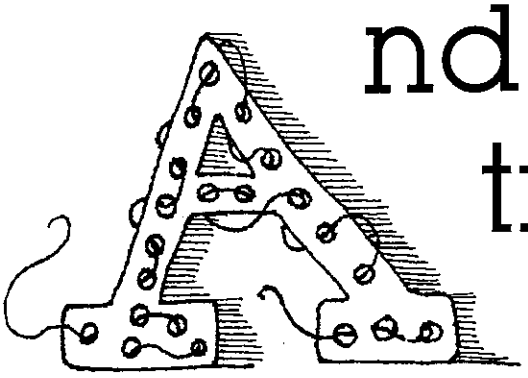

kids

feel

אבל,
בסופו של דבר
ילדים
מרגישים
יותר טוב!

YAY!

nd then it's time to say, "goodbye." Saying goodbye to your therapist, who is your own special helper

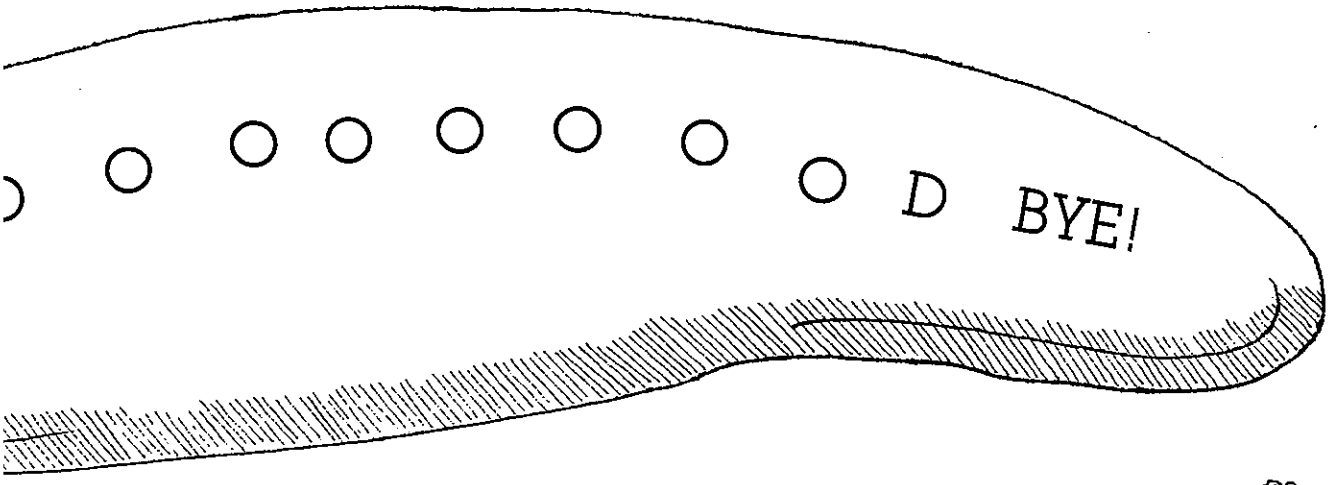

and friend, can be hard, and scary, too.

ואז מגיע הזמן להיפרד.

להיפרד מהמטפלת שלך, שהיא העוזרת המיוחדת שלך, וגם חברה מיוחדת, זה יכול להיות קשה, ואפילו קצת מפחיד.

This goodbye is different from other goodbyes because it's like saying a long goodbye.

הפרידה הזאת קצת שונה
מפרידות אחרות,
כי זה כמו להגיד
להתראות להרבה זמן.

Kids have some pretty important feelings to talk about at the end.

בסוף הטיפול, לילדים יש רגשות חשובים מאוד, שהם רוצים לדבר עליהם.

And, also, sometimes the problems come back a little.

ולפעמים, הבעיות אפילו חוזרות קצת.

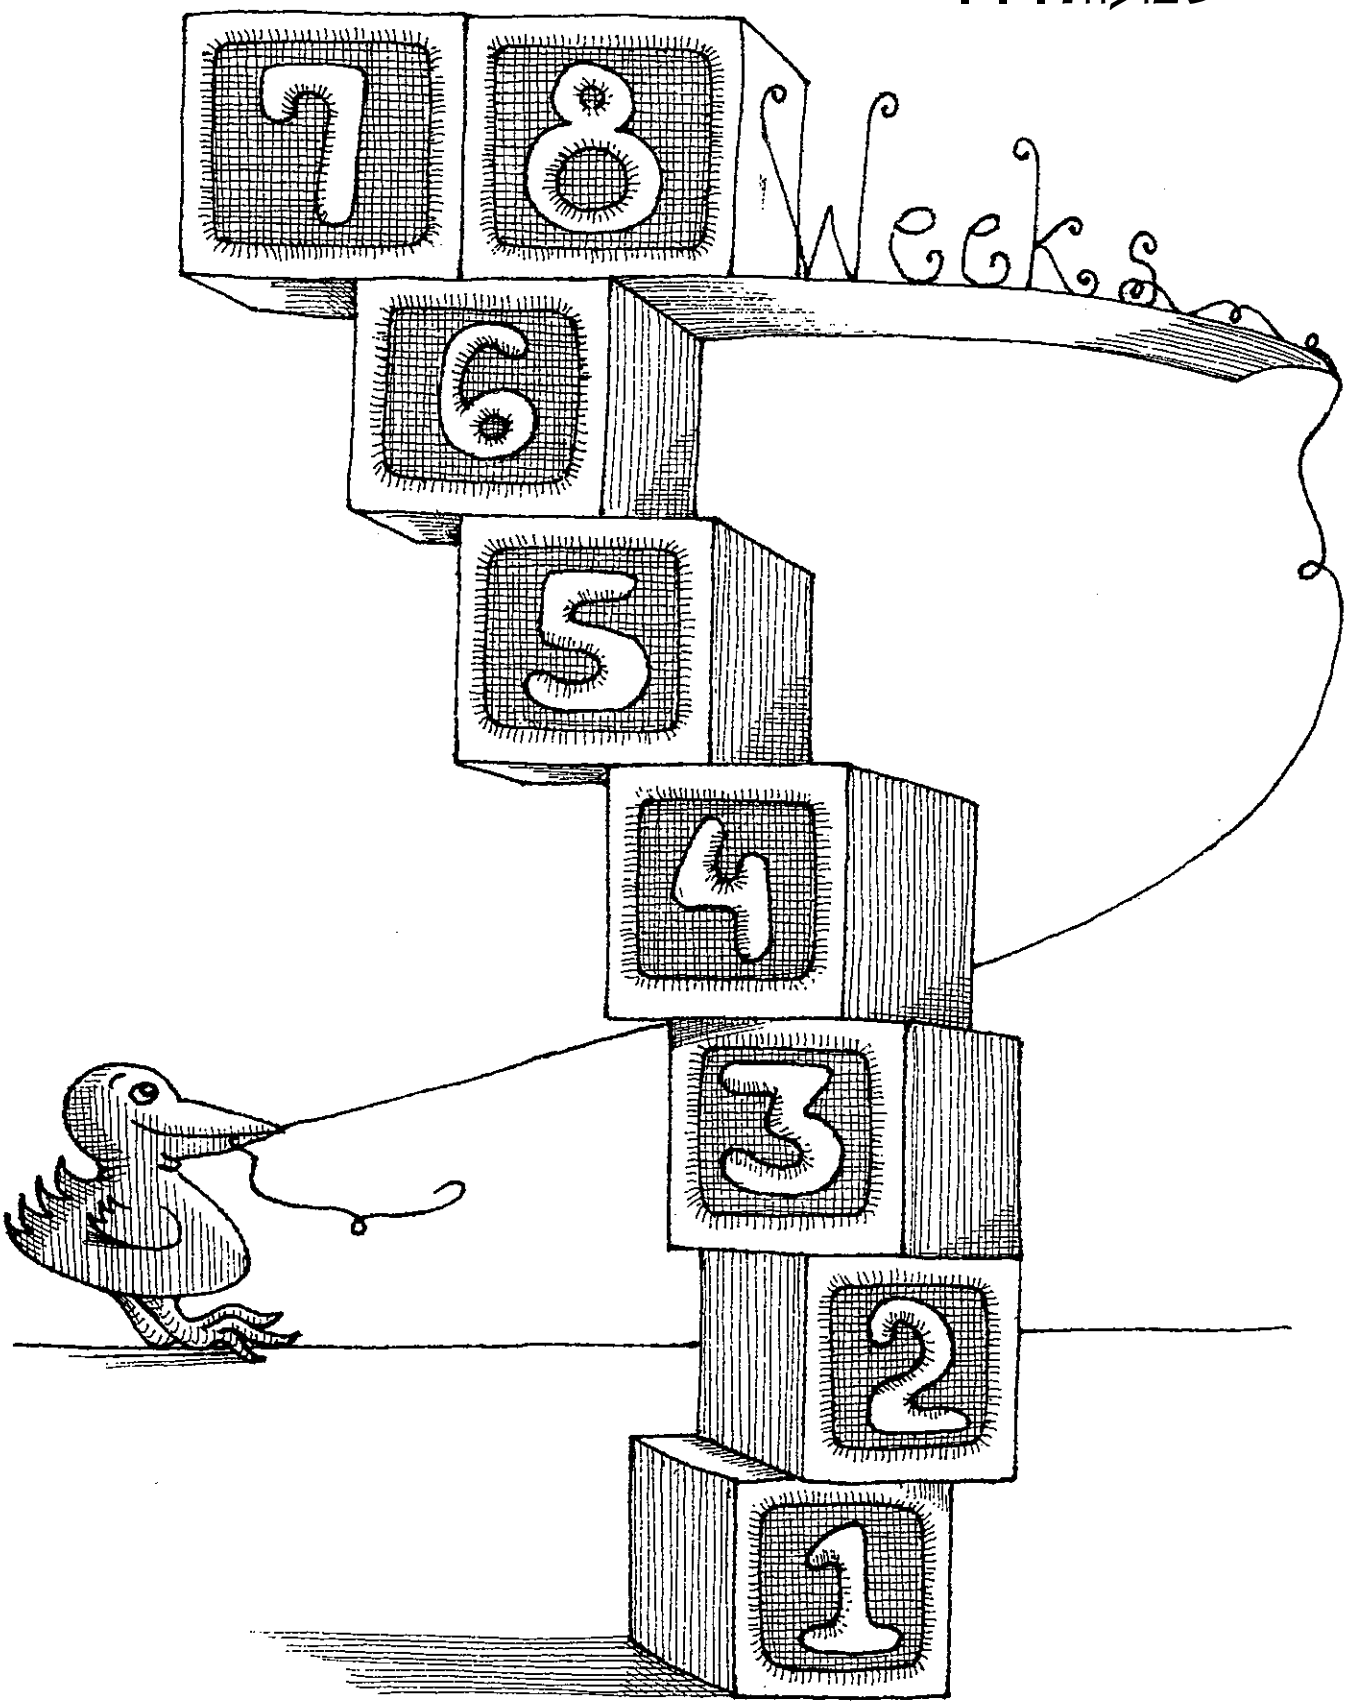

But only for a short time.

אבל רק לקצת זמן.

This last part of therapy usually takes ⟶

החלק האחרון של הטיפול בדרך כלל לוקח -->

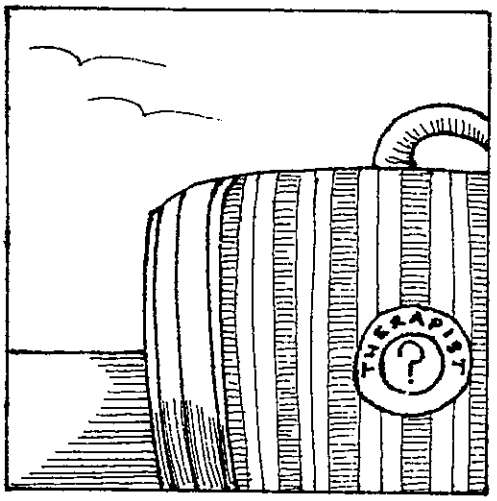

שבועות . . .

Here are some questions kids have at the end of therapy.

הנה כמה שאלות שילדים שואלים לקראת סוף הטיפול.

1. Is my therapist going away?

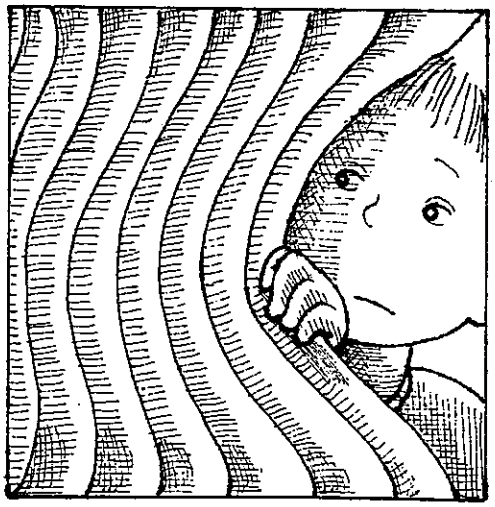

האם המטפל שלי הולך?

לא. המטפל נשאר באותו מקום. פשוט לא תמשיך לבוא לטיפול.

No, your therapist will still be in the office. It's just that you won't be going anymore.

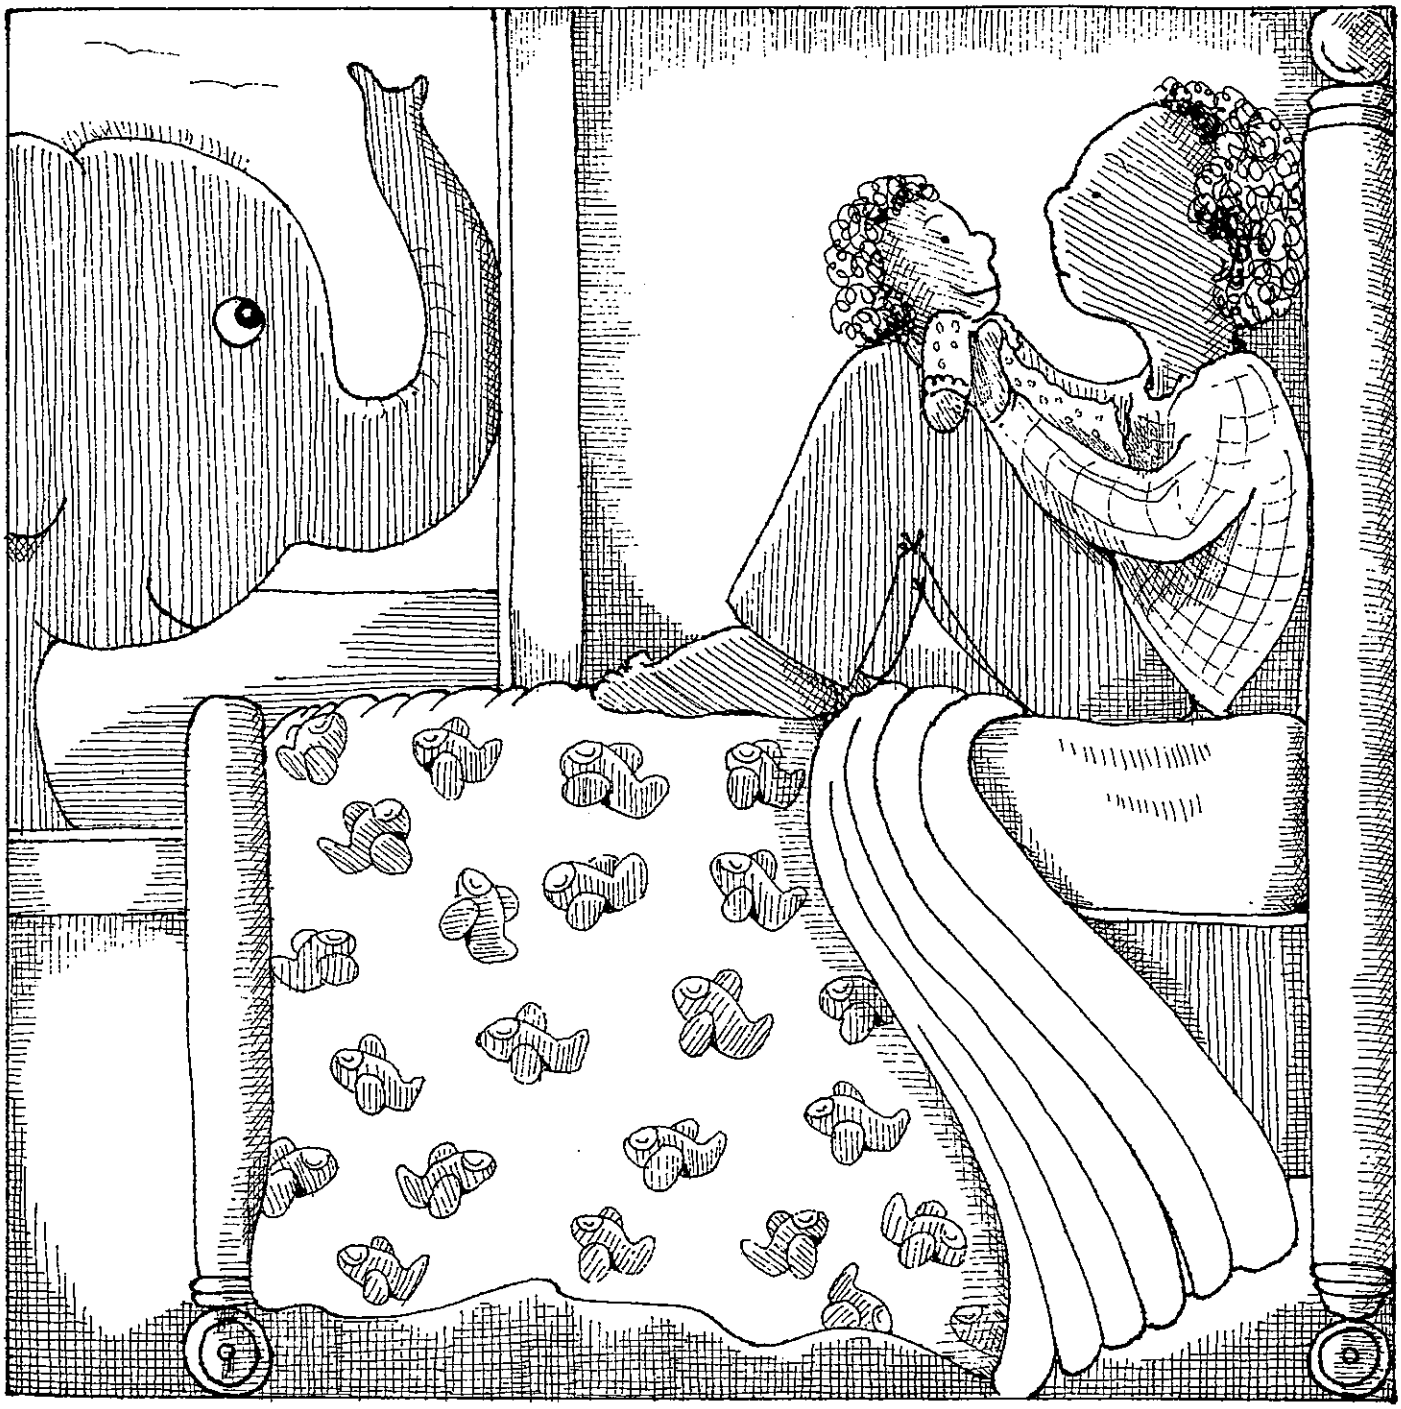

2. Will I ever see my therapist again?

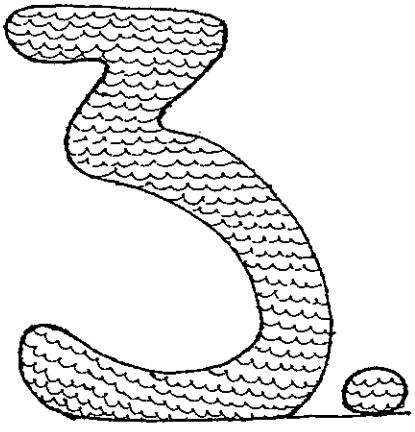

האם אני אראה אותו שוב?

אם תצטרך, אז ההורים שלך יכולים להתקשר ולקבוע ביקור.

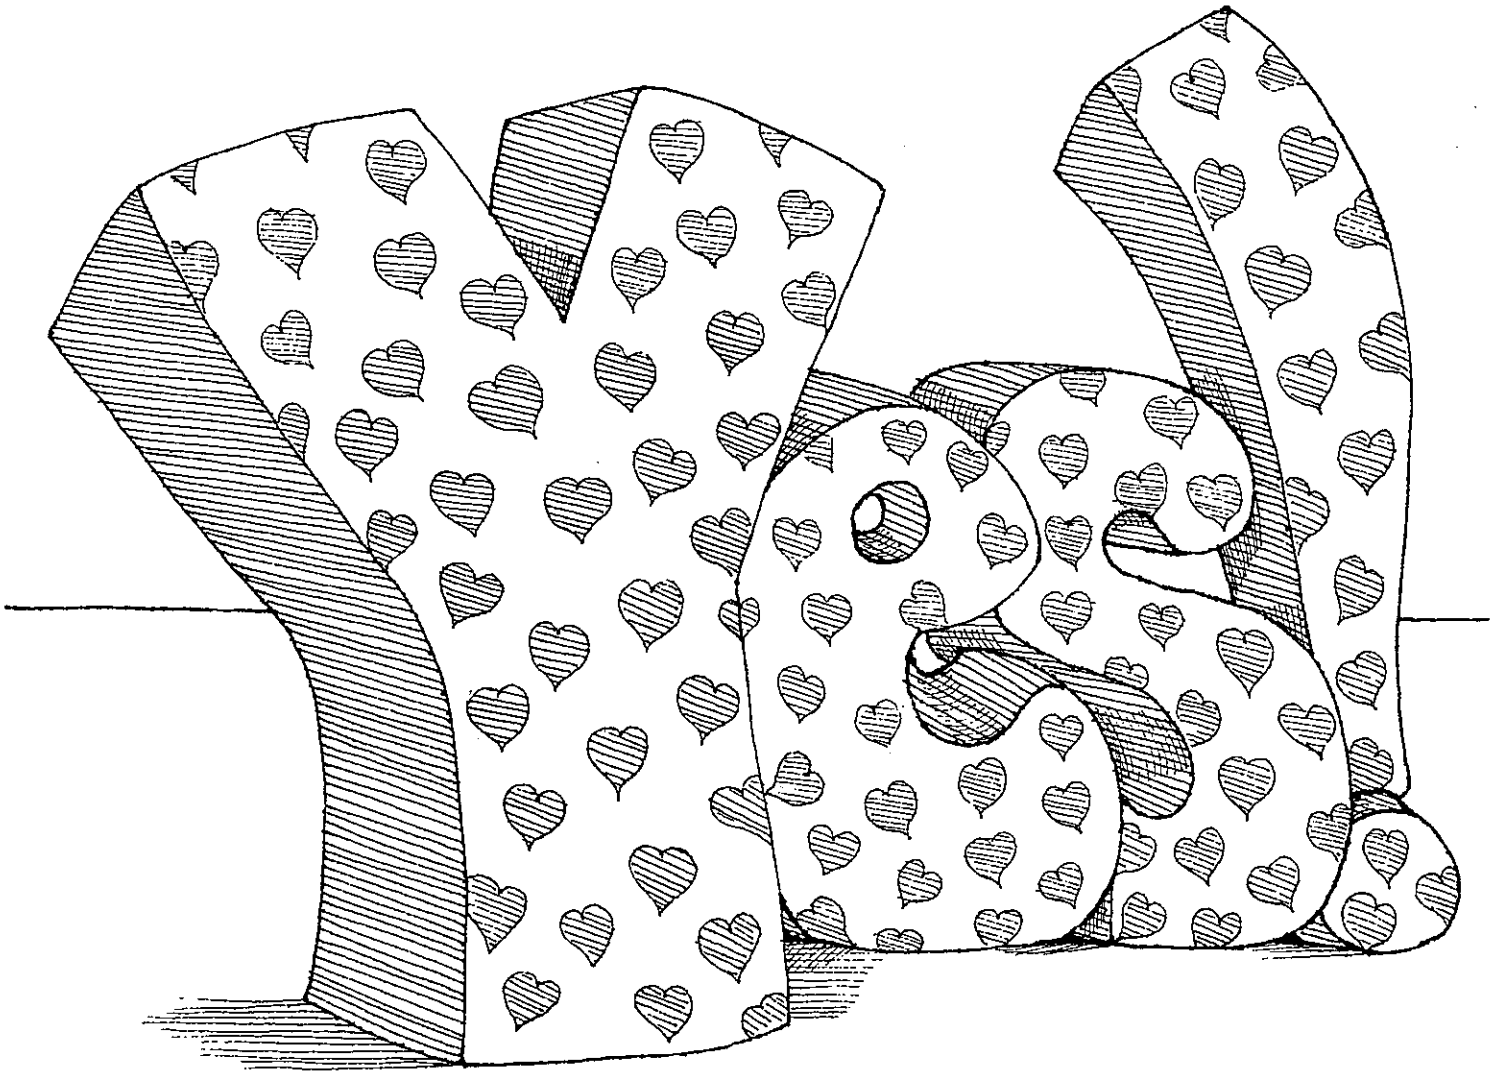

If you need to, your parents can call and arrange for you to visit.

Will my therapist remember me?

האם המטפלת שלי תזכור אותי?

כן!!!!
